

Fugenfix Crack inducer

Plastic profile inducing a controlled crack in continuously laid concrete (Fig 6). No need for costly cutting and filling of joints (Fig 5). Excellent anchoring in concrete. Retains its shape and dimension exactly. Profile can be cut to size on site, single pieces can be jointed with a rebar (Fig 2).

Fugenfix is suitable for expansion joints in concrete slab while retaining its shape and dimensions exactly.

Reference	Height	Length	Packing Qty
Fugenfix 40	40 mm	250 cm	50 m
Fugenfix 70	70 mm	500 cm	30 m
Fugenfix 125	125 mm	500 cm	25 m
