

Our Meter Guarantee

Two Full Years

We certify that every meter leaving our plant has been restored to the original manufacturer's specifications. It was skillfully adjusted by trained technicians on automatic testing equipment according to procedures specified by the American National Standard Code for Electricity Metering (ANSI C-12). Accuracy has been carefully calibrated to within 1%

Remanufactured Meters by Hialeah Meter Company are guaranteed twice as long as new meters, for two full years! We will repair or replace (at our option) any meters returned to us that we find defective or inaccurate due to our negligence. We will make no deduction or charge for the length of time already in service.

Meters must be returned to us prepaid. If we find a defect, we will correct it and return the meter to you at our expense. **We will even credit your account for the transportation charges you paid to return a meter whose defect we have verified.**

If we find the meter you returned is not defective, we may make a nominal service charge for testing and handling, plus the return transportation charges.

Exceptions

We regret that we cannot guarantee against things over which we have no control, such as damage by installation error, water, fire, lightning, overload, angry consumers, riots, etc. In addition, we will not be responsible for consequential losses that may result due to meter malfunctions, whatever their cause.
