

# INSTRUCTIONS FOR CONNECTING A 240 VOLT 3-WIRE METER USED ON A 120 VOLT 2-WIRE CIRCUIT

## FRONT VIEW OF SOCKET

## REAR VIEW OF METER

### NEUTRAL CONNECTION TO REAR OF METER

Loosen screws and slide clip open as far as possible. Connect a small flexible wire (Wire size #18-22) to the screw on which the clip remains when opened.

### WARNING!

Connecting this wire to the wrong screw will trip site breaker, or cause a flash, if not protected by a site breaker.
