

IGUANA

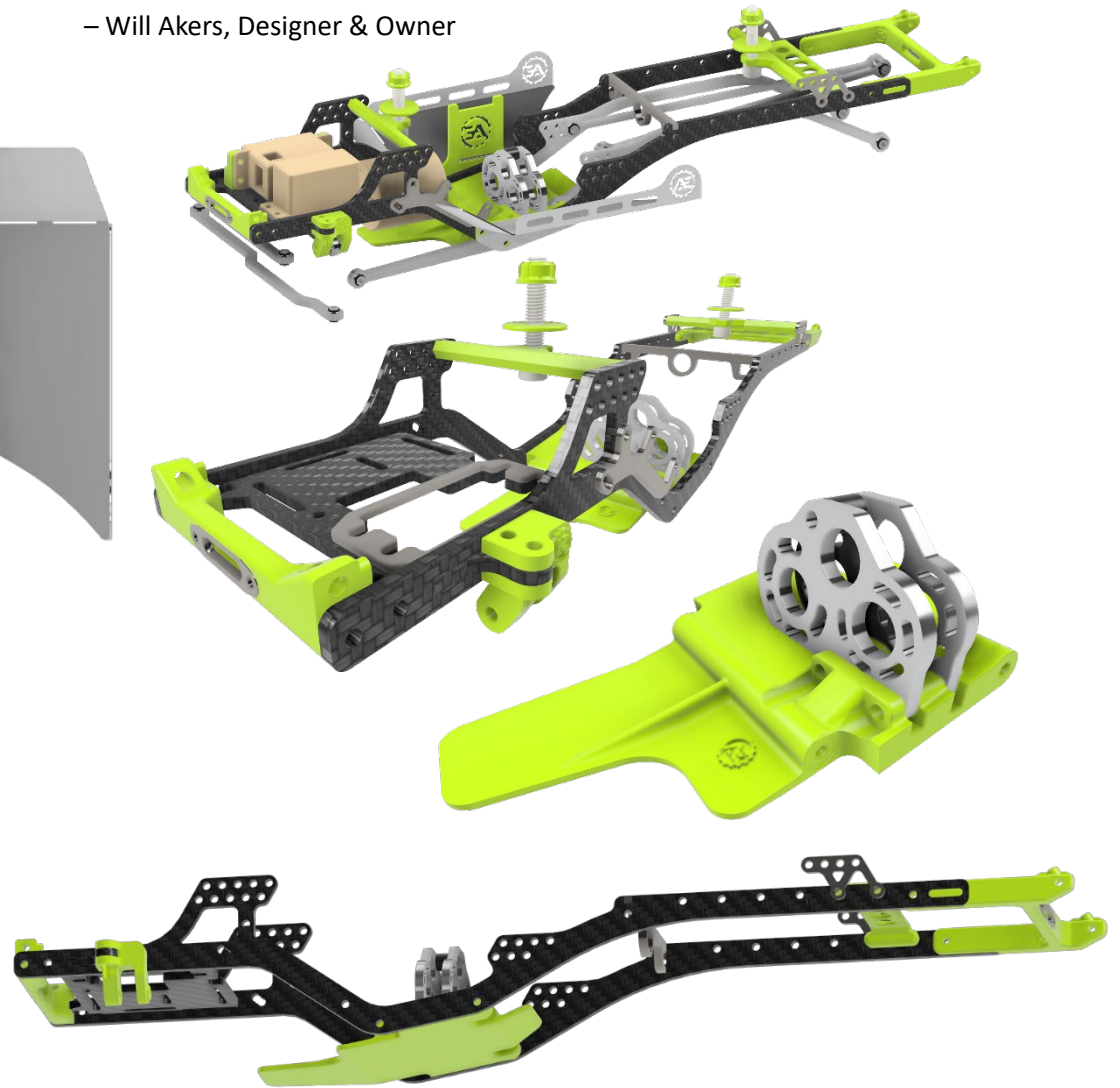

PRICING MENU

- Overall chassis length = 367mm (405mm with bumpers)
- Skid eye-eye Mounting Distance = 38mm (Axial / Element standard)
- Frame Rail Width (Inside) = 67mm
- **ABDOMEN** skid is completely smooth on the underbelly and incorporates a newly-designed transfer case with 30% OD
- Incorporates a rear carrier bearing to keep your driveshaft out of the rocks
- 10° Angled skid, excellent breakover angle, un-matched rear link/ driveshaft clearance
- Brand new one piece stainless steel and aluminum links available
- F10-specific, one-piece, high-clearance tierod allows for a smooth 60°+ steering angle
- Designed with SORRCA requirements in mind

Thank you for your interest in the new **IGUANA LCG Chassis System**. I have no doubt that this animal will continue to impress each trip out to the rocks or trail. The following is a direct result of over two years of chassis-specific development. Enjoy!

– Will Akers, Designer & Owner
