

MARCO BICEGO®

COMPANY PROFILE

Thanks to a heritage that is deeply rooted in time and in a territory where the history of Italian jewelry was born, Marco Bicego has coined a unique and unmistakable style: the elegance of refined luxury that follows women through their everyday life. A true icon of Italian craftsmanship, his creations are inspired by the organic forms of nature, by the beauty of 18kt yellow gold and by precious colorful gemstones.

Blending traditional craftsmanship with modern creativity, Marco Bicego has cultivated a singular stylistic identity. Reflecting organic, nature-inspired shapes and textures, Marco Bicego crafts innovative jewels and objets d'art with a rich textural quality, employing its signature engraving and coil techniques in precious 18kt gold set with dazzling gemstones for an extraordinary effect.

All the jewels are created in Marco Bicego's atelier in Trissino, Italy; they are made of 18 karat gold and are fitted with carefully selected gemstones which are cut to best interpret the beauty of each individual stone. All jewels are hand-crafted with traditional goldsmithing techniques, such as the 'Bulino' engraving and the distinctive coil twisting, making each creation a one-of-a-kind masterpiece, like the woman who wears it. Beautiful on their own, they can be mixed and matched so that every woman can create her personal style and wear them in every moment of the day, from an informal meeting to an exclusive evening.

Marco Bicego is distributed in more than 50 countries worldwide. In addition to the Italian flagship stores in Venice and Verona, and the boutiques in Paris, Baden-Baden, Budapest, Athens, Mykonos, Crete, New York, Tokyo and Beijing, Marco Bicego jewels can be found in the most prestigious multi-brand and department stores in the world.
