

THE TAITO MANUAL

MAKE A NEW ACCOUNT

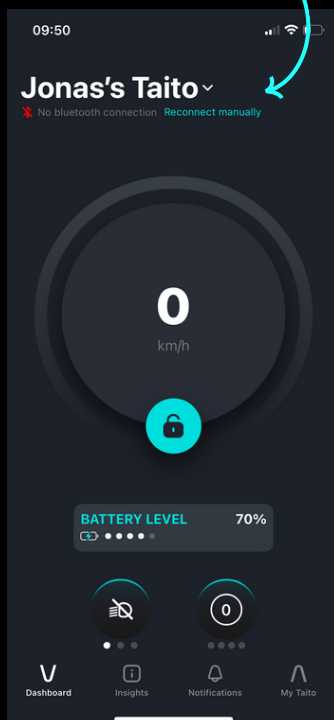

CONNECT TO YOUR TAITO S1

1. Download the Taito app -iOS- & -Android-
2. Create an account and log in to the app.
3. Turn on your Bluetooth on your smartphone.
4. Press 'let's get started' and then 'connect my taito'.

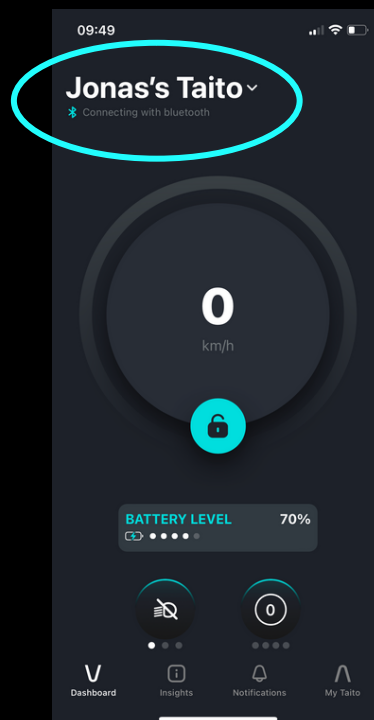

The app will automatically connect to the Taito S1. If it does not, go through the following steps:

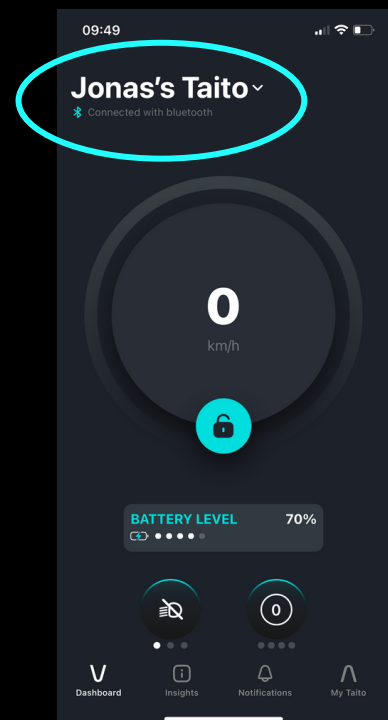

Press 'reconnect manually'

Let it search

Reconnected

DASHBOARD IN THE APP

The screenshot shows the app interface for 'Jonas's Taito'. At the top, it says 'Jonas's Taito' with a dropdown arrow and 'Connected with bluetooth' below it. The main display is a large circular speedometer showing '0 km/h'. Below the speedometer is a red lock icon. A 'BATTERY LEVEL' indicator shows '70%' with a battery icon and five dots. At the bottom, there are four navigation buttons: 'Dashboard' (V icon), 'Insights' (i icon), 'Notifications' (bell icon), and 'My Taito' (Taito logo icon). Two red arrows point from the speedometer to the text 'Here you can see your speed'. Another red arrow points from the lock icon to the text 'This button is for locking & unlocking your Taito S1'. A third red arrow points from the lock icon to the text 'This button is for turning your lights on/off'. A fourth red arrow points from the speedometer to the text 'Different modes of the Taito S1:'. Below this text is a list of four modes: 1. Max 5km/h, 2. Max 15km/h, 3. Max 20km/h, 4. Max 25km/h.

Here you can see your speed

This button is for locking & unlocking your Taito S1

This button is for turning your lights on/off

Different modes of the Taito S1:

1. Max 5km/h
2. Max 15km/h
3. Max 20km/h
4. Max 25km/h

NOTE 1: The Taito S1 must be connected to the app to operate the device.

NOTE 2: Only 1 smartphone in the same time can be connected to the Taito S1

NOTE 3: The LEDs on the side should not be green (=transport mode) If this is the case, press the button above the LEDs on the Taito S1 once.

THE DIFFERENT MODES

GREEN

Transport mode

This is the ideal mode if you transport the Taito S1 via car or train. This way, you avoid activating the alarm system.

BLUE

Ride mode

You use this mode to drive the Taito S1.

COLORLESS

Off

In this mode, the Taito S1 is off and the alarm system is activated.

Transport -> Drive mode

Press the little button above the LEDs on the Taito S1.

Drive -> Off mode

Via the app, click the button with the lock.

Off -> Drive mode

Via the app, click the button with the lock.

Transport -> Off mode

Hold the little button above the LEDs on the Taito S1 for more than 3 seconds.

GENERAL TIPS

- Make sure your mobile phone's bluetooth is on to connect with the Taito S1.
- Only 1 person can be connected to the Taito S1 at a time.
- The Taito S1 should not be in transport mode to control with the app. Otherwise, press 1X on the little button above the LEDs on the Taito S1.
- To start riding, do the following: put one foot on the platform and dismount once with the other, then press your throttle lever on the right to accelerate. Give the scooter the right direction with both your body and handlebars.
- If the Taito S1 cannot connect, after going through the steps (see 'Create a new account' page),
 - switch from ride mode to transport mode and vice versa and hang the Taito S1 on the charger.
 - Also close the app once and try connecting again.
 - Press the little button above the LEDs on the Taito S1 for more than 3 sec so that the scooter turns off.
