Important safety instructions

The use of any electrical appliance requires the following common sense safety rules.

Primarily there is danger of injury or death and secondly the danger of damage to the appliance. These are indicated in the text by the following two conventions:

WARNING: Danger to the person!

IMPORTANT: Damage to the appliance! In addition we offer the following safety advice.

Location

- Always keep your kettle away from the edge of the worktop.
- Ensure that the kettle is used on a firm, flat surface.
- Do not use the kettle outdoors or in a bathroom.

WARNING: Do not place the kettle onto a metal tray or metal surface whilst in use.

Children

- Children do not understand the dangers associated with operating electrical appliances. Never allow children to use this appliance.
- Teach children to be aware of dangers in the kitchen, warn them of the dangers of reaching up to areas where they cannot see properly or should not be reaching.

Mains lead

- The mains lead should reach from the socket to the base of the unit without straining the connections.
- Do not let the mains lead hang over the edge of the worktop where a child could reach it.

- Do not let the lead run across an open space e.g. between a low socket and table.
- Do not let the lead run across a cooker or toaster or other hot area which might damage the cable.
- Do not place the kettle where the mains lead could fall into a sink.

Your safety

- Always pour hot water slowly and carefully without tipping the kettle too fast to prevent splashing and spillage.
- Extreme caution must be used when moving a kettle containing hot water.
- Do not touch hot surfaces, use handles or knobs.
- Always close the lid securely, otherwise the kettle may not switch off automatically and may spit out boiling water.
- Avoid contact with steam from the spout when the water is boiling or just after it has switched off.
- Take care if opening the lid for re-filling when the kettle is hot.
- Do not fill above the MAX mark, otherwise boiling water may be ejected.
- Do not hold the switch in the on position or tamper with the switch to fix it in the on position as this may cause damage to the switch-off mechanism.
- Unplug from the outlet before cleaning.
- Allow to cool before putting on or taking off parts and before cleaning.

Treating scalds

- Run cold water over the affected area immediately. Do not stop to remove clothing, get medical help quickly.

Other safety considerations

- To protect against fire, electric shock and personal injury do not immerse cord, plug or kettle in water or any other liquid.
- Do not operate any appliance with a damaged cord or plug or after the appliance malfunctions or has been damaged in any manner. Ring the helpline number for advice on examination and repair.
- The use of attachments or tools not recommended or sold by Morphy Richards may cause fire, electric shock or injury.
- Do not tamper with the connector in any way.
- Do not use the kettle for any use other than to boil water.
- Do not use outdoors.
- Do not place the kettle on or near a hot gas or electric burner or in a heated oven.
- The kettle must not be plugged to the socket when being filled with water.
- Unplug from the outlet when not in use.

Electrical requirements

Check that the voltage on the rating plate of your appliance corresponds with your house electricity supply which must be A.C. (Alternating current).

For appliances with fitted plug. If the socket

outlets in your home are not suitable for the plug supplied with this appliance the plug should be removed and the appropriate one fitted.

IMPORTANT : THE PLUG REMOVED FROM THE MAINS LEAD, IF SEVERED, MUST BE DESTROYED AS A PLUG WITH A BARED FLEXIBLE CORD IS HAZARDOUS IF ENGAGED INTO A LIVE SOCKET OUTLET.

Should the fuse in the 13 amp plug require changing a 13 amp BS1362 fuse must be fitted.

WARNING: THIS APPLIANCE MUST BE EARTHED.

Features

- 1 Lid
- 2 Spout
- 3 Element
- 4 Reset button
- 5 Power on neon

Using

Filling the kettle

- Wherever possible fill through the spout, as this helps to free the filter from limescale build-up.

- Always ensure that the level of water in the kettle is filled to at least the minimum level shown on the water gauge.
- Boil only as much water as you need as this saves electricity.

Switching it on

- Plug in and switch on at the wall socket.
- Switch the kettle on. The 'power on' neon, will light up.
- When the water boils the kettle will switch off automatically.
- If you are using the kettle for the first time, pour away the boiled water and refill.
- To re-boil, switch to ON again. If the kettle has just switched off wait a minute or so before switching it back on again.
- If you do not put in enough water, or switch on the kettle when it is empty, the safety cut-out will switch off the power automatically. If this happens, refill and wait a few minutes for the element to cool, then use as normal.

Filter removal (for models fitted with removable filter)

- 1 Open the lid.
- 2 Lift the filter upwards from its location.
- 3 To refit the filter, slot it into the side wall guides and press down firmly. Ensure the filter is correctly located into the central guide.

WARNING: Unless the filter is fitted correctly, the kettle lid may not close and lock securely and the kettle may not switch off automatically.

Descaling

IMPORTANT: This kettle must be descaled regularly. The frequency of descaling depends on usage and the hardness of the water in your area.

Excessive scale can cause the kettle to switch off before boiling and may damage the element invalidating the warranty.

It is essential that regular descaling takes place.

Remove hard scale using a proprietary descaling product suitable for plastic kettles.

Alternatively use citric acid crystals (available from most pharmacies) as follows.

1. Fill the kettle 3/4 full, boil, then unplug the kettle (remove the cordless kettle from the base unit) and stand it in an empty sink or bowl.
2. Add 50gm of citric acid crystals to the water gradually, then leave the kettle to stand. Do not use a more concentrated solution.
3. As soon as the effervescence subsides, empty the kettle and rinse it thoroughly with cold water.
4. Wipe the outside of the kettle thoroughly with a damp cloth to remove all traces of acid which may damage the finish.

IMPORTANT: Ensure that the electrical connections are completely dry before using the kettle.

Cleaning

WARNING: Always disconnect the plug from the mains and allow the kettle to cool before cleaning.

Wipe the outside with a damp cloth.

IMPORTANT: Do not use abrasive cleaners on the outside of the kettle which may scratch the surface.

Helpline

If you have any difficulty with your appliance, do not hesitate to call us. We're more likely to be able to help than the store from where you bought it.

Please have the following information ready to enable our staff to deal with your query quickly:

- Name of the product
- Model number as shown on the underside of the appliance.

Technical Data

Power Supply : AC 230V 50Hz

Wattage : 1000W

Morphy Richards products are intended for household use only

Morphy Richards has a policy of continuous improvement in product quality and design. The Company, therefore, reserves the right to change the specification of its models at any time.
