

This miniature cabinet scraper is a scaled-down version of the Veritas® Cabinet Scraper. The body is investment-cast steel that has been accurately machined and ground. The plane features a 0.92" wide, 0.03" thick spring steel blade. The depth of cut can be adjusted using the cambering knob.

Blade Sharpening

The blade is sharpened with a 45° bevel angle. For best results, burnish a hook on the cutting edge. Install the blade as shown. (Note bevel orientation.)

Note: A corrosion-inhibiting paperboard chip is included in the case. It will provide continuous corrosion protection for up to two years.
