

Sharpening Innovation

THE ULTIMATE WETSTONE SHARPENING SYSTEM

The Tormek name is synonymous with quality and precision. Tormek have been making sharpening systems for over 40 years and currently make the three most innovative and easy to use systems on the market, the Tormek T-4 Original, Tormek T-8 Original and Tormek T-8 Custom. Use with a multitude of Tormek jigs and accessories for all of your sharpening needs.

8 Reasons to own a Tormek

- ✓ **SHARPEN ALL YOUR EDGE TOOLS**
With the wide range of Tormek patented jigs, you can sharpen practically all types of edge tools.
- ✓ **EXACT REPLICATION**
The key word when sharpening the Tormek way is repeatability. Even complicated shapes are easily re-sharpened.
- ✓ **CLEANEST EDGES**
The water cooled Tormek machines will create the cleanest edge. Finish the sharpening process by honing and polishing the bevel on the leather honing wheel.
- ✓ **NO RISK OF OVERHEATING**
There is no risk that the edge becomes overheated and loses its hardness or temper.
- ✓ **SAFE AND QUIET**
No sparks are produced. Worn steel particles are deposited into the water trough keeping the air clear of grinding dust.
- ✓ **LONGER TOOL LIFE**
You have full control and remove no more steel than necessary. Your tools will last longer.
- ✓ **FAST SHARPENING**
Once the shape is created, you remove only a fraction of the steel when re-sharpening, which makes it a quick job.
- ✓ **FULL CONTROL**
Tormek machines come with a powerful motor and unique gear system.

TURN OVER FOR MORE JIGS AND ACCESSORIES

TURNING JIGS

SVD-186 R GOUGE JIG
106606

- Sharpen woodturning tools and carving gouges up to 50mm
- Offers full control over bevel angles, shape and length
- Exact repeatability, every time, superior, longer lasting edges
- Rotation stop for sharpening smaller carving V-tools

SVS-50 MULTI-JIG
910091

- Can be used for sharpening turning tools, carving tools, skew and oval chisels, parting tools, roughing gouges and carving gouges up to 50mm

SVD-110 TOOLREST
910083

- Wide plate excellent for sharpening and re-truing a variety of tools including scrapers and carving gouges

TTS-100 TURNING TOOL SETTER
202317

- Enables exact replication of the edge on bowl and spindle gouges, flat and oval skewers
- Works with SVD-186 R Gouge Jig and SVS-50 Multi Jig
- Works on any diameter of stone

CARVING JIGS

SVS-38 SHORT TOOL JIG
910090

- For short carving tools and chisels
- Also suitable for power carving tools

SVM-00 SMALL KNIFE HOLDER
504136

- Used in conjunction with the SVM-45 Tormek Knife Jig
- SVM-00 holds the knife handle then clamps into the SVM-45
- The SVM-00 enables complete control when sharpening small knives
- Sharpen knives of different shapes for whittling, chip carving and detail work
- Sharpen narrow chisel knives, boring or fish filleting knives
- Enables sharpening of small blades of folding knives

SVA-170 AXE JIG
910081

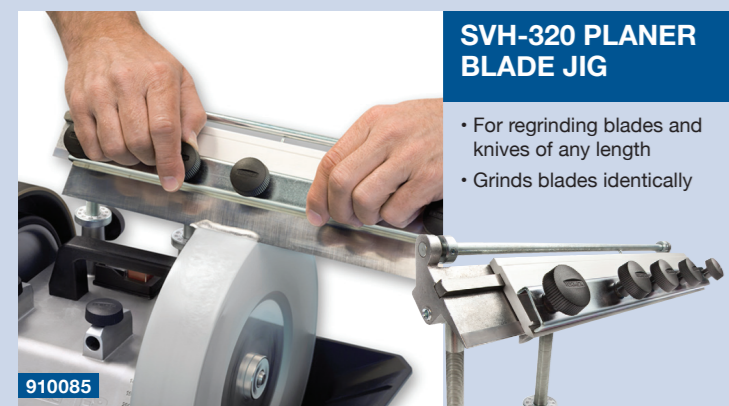

- Allows both axe bevels to be ground at exactly the same angle
- Adjustable height for different angles if required
- Max head size 165mm

SVM-45 KNIFE JIG
910088

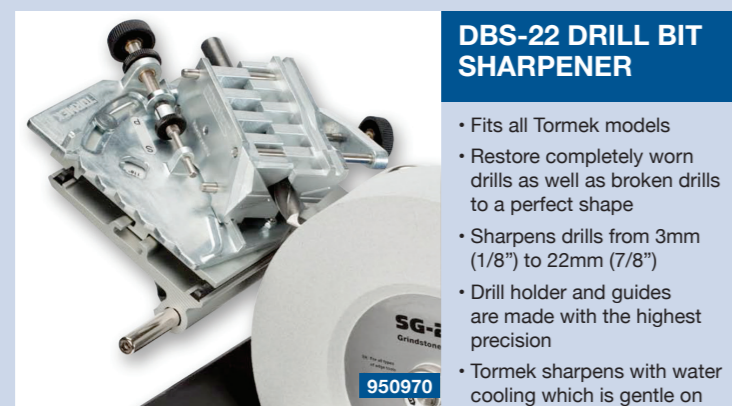

- For sharpening knives of various lengths
- Adjustable to suit different blade thicknesses
- Minimum blade size 70mm

WORKSHOP JIGS

SVH-320 PLANER BLADE JIG
910085

- For regrinding blades and knives of any length
- Grinds blades identically

DBS-22 DRILL BIT SHARPENER
950970

- Fits all Tormek models
- Restore completely worn drills as well as broken drills to a perfect shape
- Sharpens drills from 3mm (1/8") to 22mm (7/8")
- Drill holder and guides are made with the highest precision
- Tormek sharpens with water cooling which is gentle on the steel
- Creates a 4-facet point which gives the ideal cutting performance
- The optimal point and clearance angle can be set according to requirements

SVP-80 MOULDING KNIFE ATTACHMENT
701403

- Sharpens all shapes of moulding knives
- Sharpens all moulding knives with 24/30/38mm between centre holes
- Face is precision ground
- Knife held in position with magnet & guiding pins
- Up to maximum width of 100mm
- Not suitable for knives without holes

HAND JIGS

SVA-170 AXE JIG
910081

- Allows both axe bevels to be ground at exactly the same angle
- Adjustable height for different angles if required
- Max head size 165mm

SVX-150 SCISSORS JIG
910092

- For all sizes of scissors and most garden shears
- Two clamps hold blade securely

SE-77 SQUARE EDGE JIG
102331

- Even clamping pressure for stability and security when sharpening
- Unique design, chisels and plane irons sit squarely in the jig
- Fine adjustment for a precise 90° edge
- Allows sharpening a controlled camber on a hand plane blade
- Clamp and sharpen Japanese chisels
- Safety stops keep the jig secure on the support bar
- Comes as standard with the Tormek T-8 Original

SVM-45 KNIFE JIG
910088

- For sharpening knives of various lengths
- Adjustable to suit different blade thicknesses
- Minimum blade size 70mm

SVM-140 LONG KNIFE JIG
702085

- Made especially for long and thin knives to give extra stability
- Use with any blade longer than 160mm

TORMEK T-8 ORIGINAL WATERCOOLED SHARPENING SYSTEM

- The original and still the best wetstone sharpening system
- Revolutionary fully cast housing for strength and accuracy
- Micro adjustable support for complete control of sharpening angle
- Integral sleeves for universal support bar guarantees correct alignment
- Screw lift rise and fall mechanism for water trough
- Sharpens all types of steel, including high speed steel (HSS)
- 8 year warranty (5+3)
- Includes everything you need to sharpen planes, blades and chisels quickly and accurately

8 YEAR WARRANTY
5+3
after on-site registration

TORMEK T-4 ORIGINAL COMPACT WATERCOOLED SHARPENING SYSTEM

- Compact, high quality sharpening system with 200mm wet stone
- Sharpen hand tools, knives, scissors, woodturning and woodcarving tools
- Stainless steel shaft
- Strengthened housing for improved sharpening results
- Solid zinc, precision machined top incorporating the handle
- 8 year warranty (5+3)
- Can be used with all Tormek jigs

8 YEAR WARRANTY
5+3
after on-site registration

TORMEK Sharpening Innovation

HTK-806 HAND TOOL KIT

- Maintain an edge on a wide range of tools
- Packed in a high-quality TC-800 Tormek Case with industrial quality foam insert
- Comprises 6 of Tormek's most popular and useful jigs
- SVM-45 for general and short knives
- SVM-140 for long and thin knives and filleting knives
- SVX-150 for scissors and shears
- SVS-38 for carving and butt chisels
- SVA-170 for axes and hatchets
- SVM-00 for carving knives and pocket knives

TNT-808 WOODTURNER'S KIT

- Sharpen turning tools with complete control
- Packed in a high-quality TC-800 Tormek Case with industrial quality foam insert
- Contains Tormek's most popular and useful woodturner's jigs
- SVD-186 R for turning gouges and tool tips
- SVS-50 for carving and lathe tools
- TTS-100 angle and setting gauge
- SVD-110 support plate
- LA-120 profiled honing wheels
- MH-380 machine cover
- TNT-300 DVD and comprehensive tuition manual

TC-800 TORMEK CASE

- Get organised, keeps jigs and accessories together
- High-quality, tough material with leather handle
- Transparent, sliding lid for quickly finding the right jig
- Stackable for easy storage
- Compatible with the Tormek storage trays
- HTK-00 (106797), TNT-00 (106798) and T8-00 (106799)

TS-740 SHARPENING STATION

- Drawers to fit Tormek storage trays and kits, moisture-proof composite worktop
- Adjustable legs for comfortable working height, rubber feet protect floor
- Auto-return soft close drawer function, centralised key locking

US-430 UNIVERSAL EXTENDED SUPPORT

- Sharpen extra long knives and wide cleavers
- Micro adjustable for precise setting of edge angles
- 50mm slide extension covers honing wheel
- Extra height accommodates wide cleavers
- Length: 436mm, height: 212mm

WM-200 PRO-ANGLEMASTER

- Angle setting with pin point accuracy from 15° to 75°
- For grindstones of 6" to 10"
- Angle checking notches

RM-533 RUBBER MAT

- A waterproof and non-slip surface
- Raised rim helps to retain water
- Ultra heavy duty
- Protects any work surface
- Cleans easily

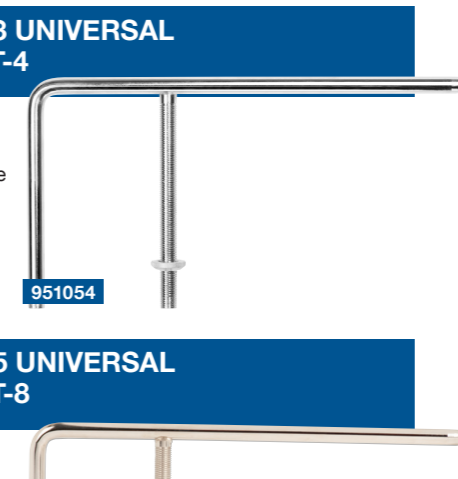

SP-650 STONE GRADER

- Unique double-sided grader
- Effectively grade your original stone from 220 grit to 1000 grit

TORMEK US-103 UNIVERSAL SUPPORT FOR T-4

- Very useful extra universal tool support
- Allows quick interchange between horizontal and vertical
- Micro adjuster for smooth, easy and accurate operation

RB-180 ROTATING BASE

- An easy way to rotate your machine 180°
- Simple to switch from sharpening to honing on the leather wheel
- Low profile; minimal effect on working height
- Rubber feet ensure it remains steady during sharpening
- Fits all Tormek models
- Design allows for easy cleaning

MH-380 PROTECTIVE COVER

- Protects your Tormek machine

TORMEK EM-15 EDGE MARKER

- High-quality, permanent marker with a chisel tip
- Colour the bevel of the tool before you begin sharpening
- Highlights the point of contact and helps monitor progress

GRINDING WHEELS

SG-250 ORIGINAL GRINDSTONE
910079

- The most versatile Tormek stone
- Smooth surface finish
- Cuts all types of tools & steel qualities including HSS

SB-250 BLACKSTONE SILICON
723803

- Designed for hard materials and fast sharpening
- Delivers fast steel removal on HSS and exotic alloys and can 'touch up' tungsten carbide
- Can be graded with the stone grader

SJ-250 JAPANESE WATERSTONE
723802

- Delivers an extra fine surface finish
- Excels at sharpening hand tools where a minimum of steel removal is needed
- 4,000 grit ideal for carving tools, scissors, knives, plane irons and bench tools

SG-200 ORIGINAL GRINDSTONE
910078

- The most versatile Tormek stone
- Smooth surface finish
- Cuts all types of tools & steel qualities including HSS

SJ-200 JAPANESE WATERSTONE
210036

- Delivers an extra fine surface finish
- Excels at sharpening hand tools where a minimum of steel removal is needed
- 4,000 grit ideal for carving tools, scissors, knives, plane irons and bench tools

DIAMOND WHEELS

Tormek, already one of the most versatile and comprehensive sharpening systems, now has even more potential. These Tormek diamond-grinding wheels offer huge benefits: exceptional durability and the ability to sharpen on the flat side as well as the periphery. Used together with MB-100 multi base you can sharpen on the side of the diamond wheel to produce a completely flat bevel, which may be preferable in some cases.

In addition, these diamond grinding wheels will never require dressing and will always retain their original diameter. All wheels are 250mm diameter.

The quality of the diamond surface provides a high quality and consistent finish to your edge tools. Diamond is the world's hardest material and almost twice as hard as cubic boron nitride (CBN). Diamond's extreme hardness and durability make it the ultimate abrasive material for sharpening. Diamond as a material is ideal to use with the watercooled low speed Tormek method. Tormek Diamond Wheels can sharpen all types of material, including steel, ceramic, and tungsten carbide. These wheels fit all Tormek machines with a 250mm diameter stone capacity.

DC-250 DIAMOND WHEEL COARSE
104773

- Coarse 360 grit quickly restores dull edges and removes nicks
- Sharpens on the flat side as well as the periphery

DF-250 DIAMOND WHEEL FINE
104771

- Fine 600 grit for efficient steel removal with smooth surface finish
- Sharpens on the flat side as well as the periphery

DE-250 DIAMOND WHEEL EXTRA FINE
104770

- Extra Fine 1,200 grit for refined and polished edge
- Sharpens on the flat side as well as the periphery

MB-100 MULTI BASE
104775

- Specifically for use with Tormek diamond wheels
- Allows sharpening on the side of the diamond wheel
- Produce a perfectly flat bevel on chisels, plane irons etc

ACC-150 ANTI-CORROSION CONCENTRATE (PKT 2)
104778

- Recommended for Tormek diamond wheels
- Suitable for all wetstone grinders, protects tools and machine

HONING WHEELS

LA-220 LEATHER HONING WHEEL
101357

- Replacement leather honing wheel, 220mm diameter
- Use in conjunction with PA-70 honing compound
- Removes the burr, brings the edge to a mirror finish and razor sharpness
- Fits all previous machines with a 220mm diameter honing wheel capacity

CW-220 COMPOSITE HONING WHEEL
101353

- No need for additional honing compounds or pastes
- Fits all previous machines with a 220mm diameter honing wheel capacity

LA-145 LEATHER HONING WHEEL
101354

- Replacement leather tyred honing wheel, 145mm diameter
- Use in conjunction with PA-70 honing compound
- Removes the burr, brings the edge to a mirror finish and razor sharpness
- Fits all previous machines with a 145mm diameter honing wheel capacity

LA-120 PROFILED LEATHER HONING WHEEL
306015

- For the honing and polishing of the inside of turning gouges, woodcarving gouges and V-parting tools
- Made of solid tanned leather
- Two standard discs have a radius of 3 mm (1/8") and a 60° tip

PA-70 HONING PASTE
910077

- For application on the leather honing wheels
- Grain size 3 micron (average)
- Removes the burr and polishes the edge to a mirror finish
