

LOEV

We offer three sizes for our bangles: small, medium and large.

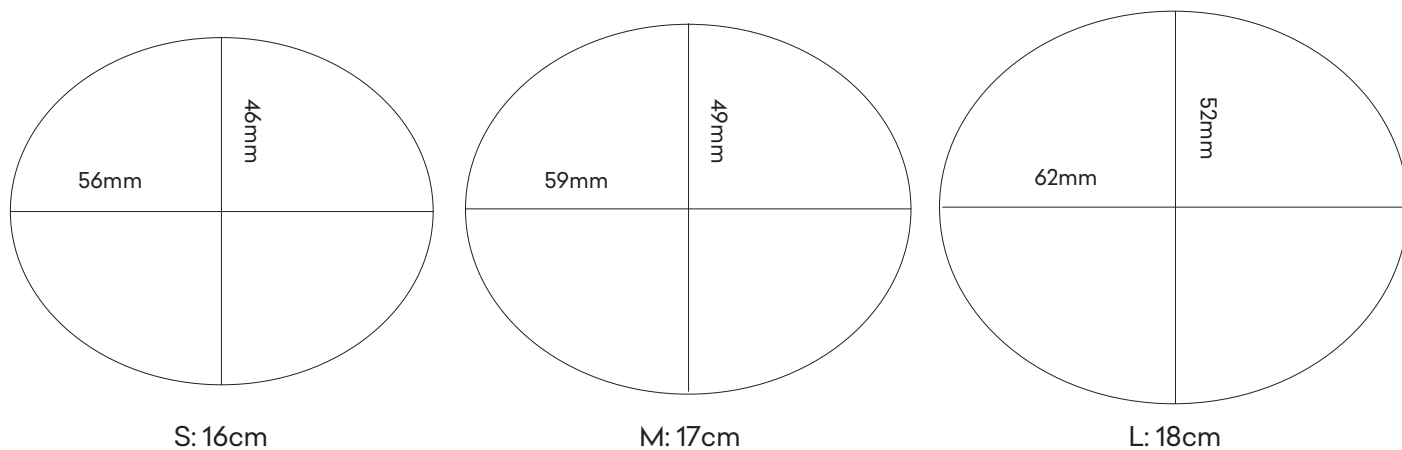

You can determine your wrist size with a simple tape measure.

The inside circumferences of our bangle sizes are:

S: 16cm M: 17cm L: 18cm

You can refer to the diagrams below for approximate width and length measures.

All measures refer to the inside width, length or circumference.

If you have an existing bangle that you would like to measure, you can print this page and place your bangle on the ovals to determine its size.

When you have printed, check with a ruler that this line is 2cm long:
