Unpacking Instructions

1. Check whether the items are complete according to the【Packing List】(Page 3).

2. Assemble the product properly according to the【Product Structure】(Page 3).

3. Make sure to use the power adapter that comes with the product; The feeder will be automatically turned on when power is on.

4. Refer to the【Wi-Fi Connection】(Page 6) to connect the feeder to your Wi-Fi and pair the feeder with your cell phone on the Catlink App.

5. Make sure to reset the scale while there is nothing in the ceramic bowl.

6. Add enough food to the food container, below the Max mark.

7. After completing the steps above, the feeder can be used functionally.

Wi-Fi Connection

1. Search for CATLINK in your mobile Application store, download and install the CATLINK App, or scan the QR code on the right to download.

2. Connect your mobile phone to 2.4GHz Wi-Fi Currently, the fountain doesn't support 5GHz Wi-Fi or Wi-Fi that requires special certification such as hotels and airports Wi-Fi.

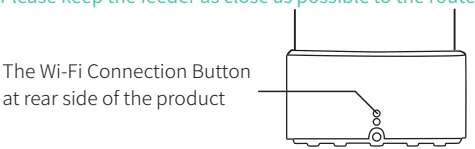
   *Please note that the Wi-Fi name cannot contain Chinese, spaces, or other special characters, so as not to affect the network configuration.

3. Please open the CATLINK App to register and log in. Then click "add equipment", choose "CATLINK Feeder", and follow the instructions to finish the rest of the setup.

   *Please authorize location information on your phone. (GPS needs to be turned on for Android phones.)

4. Long press the network configuration button on the back of the feeder until you hear a beep sound and the LED light indicator flashes in green, then release the button.

   *Please keep the feeder as close as possible to the router and make sure that the feeder is powered on.



5. Check and complete all the steps on the CATLINK App and click next; Enter the Wi-Fi password and click next, and then wait for the network configuration to be completed.

   *If there is a network configuration failure, please be patient and perform the network configuration again, and check whether the Wi-Fi password entered is correct.There may be network configuration problems for some Android phones. If possible, you can use another phone for network configuration. After success, share the device with your own phone.
   *Please contact our customer service staff for assistance in time if you have followed the network configuration instructions correctly yet still failed at configuring multiple times.

6. After completing the above steps, all functions related to the feeder can be used on the CATLINK.

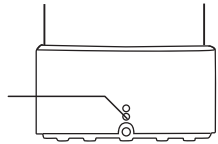
Scale Reset Instructions

1. Empty the ceramic bowl to ensure there's nothing in the bowl.
2. Place the ceramic bowl properly.

   *Handle with care, to protect the weighing sensor placed at the bottom of the bowl tray, and to extend the service life of the weighing sensor to ensure data accuracy.
3. Long press the scale reset button until there is a beep sound and the LED light indicator flashes in blue; then release the button.

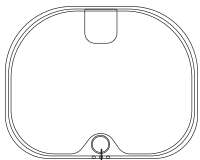
   *Please refer to the weight data on the Catlink App. When the weight data on the App shows 0, the scale has been reset.

The scale reset button on the back of the feeder



4. After completing the steps above, the ceramic bowl has been weighed and reset to zero.

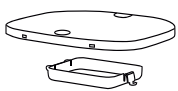
Button operation



Feed Button

- **Dispensing one portion of the food:** short press the feed button once and then release;
- **Continuous dispensing:** long-press the feed button to dispense the food continuously; release the button to stop dispensing;
- **Lock the feed button:** Press the feed button three times to lock it; press the feed button three times again to unlock it.

Desiccant Use Instructions



Desiccant storage box

1. There is a desiccant storage box attached to the food container lid.
2. It is recommended to replace the desiccant regularly.

*It is recommended to replace the desiccant according to the reminders on the CATLINK App

Cleaning and Precautions

1. **Shut down the feeder** (both main power and backup power if in use).
2. **Parts that can be washed directly:** safety doors, food container lid (desiccant needs to be removed beforehand), desiccant storage box, food container liner, ceramic bowl.
   *Make sure to wipe the parts with dry paper towels after washing
3. **Parts can only be cleaned with wet wipes:** exterior and interior of the feeder base (including food dispensing channels, etc.)
   *Contains electronic components; can not be washed directly
