# OUR DIFFERENCE

$\oplus$	Why use Straightcurve®	28
$\oplus$	Entire Product list	30

Deciding what you need or simply seeking inspiration? At some point there comes a time to choose if the lines in your garden will be straight or curving. The product range is designed to have solutions for both, so it's helpful to know just what you want!

# **STRAIGHT**

Hardline™ is the heavy duty option for strong straights with a foot to make them sturdy, it's so grounding!

 $Rigidline^{\text{TM}}\,is\,suited\,for\,firm\,straight\,lines$ as it is more rigid than  $Flexline^{TM}$ .

# **CURVED**

Use the Flexline™ range for organic and flowing lines. As they flex rather than bend you can make all curves effortlessly by hand on site as you go, it comes naturally!

### **COMBINATIONS**

It's OK to have some of each in a garden too. Our Rigidline  $^{\text{TM}}$  will join with our Flexline $^{\text{TM}}$  of the same height.

# Finish choices

The entire Straightcurve® range is available in a weathering steel or galvanised finish. Perfect for whatever look you are going for!

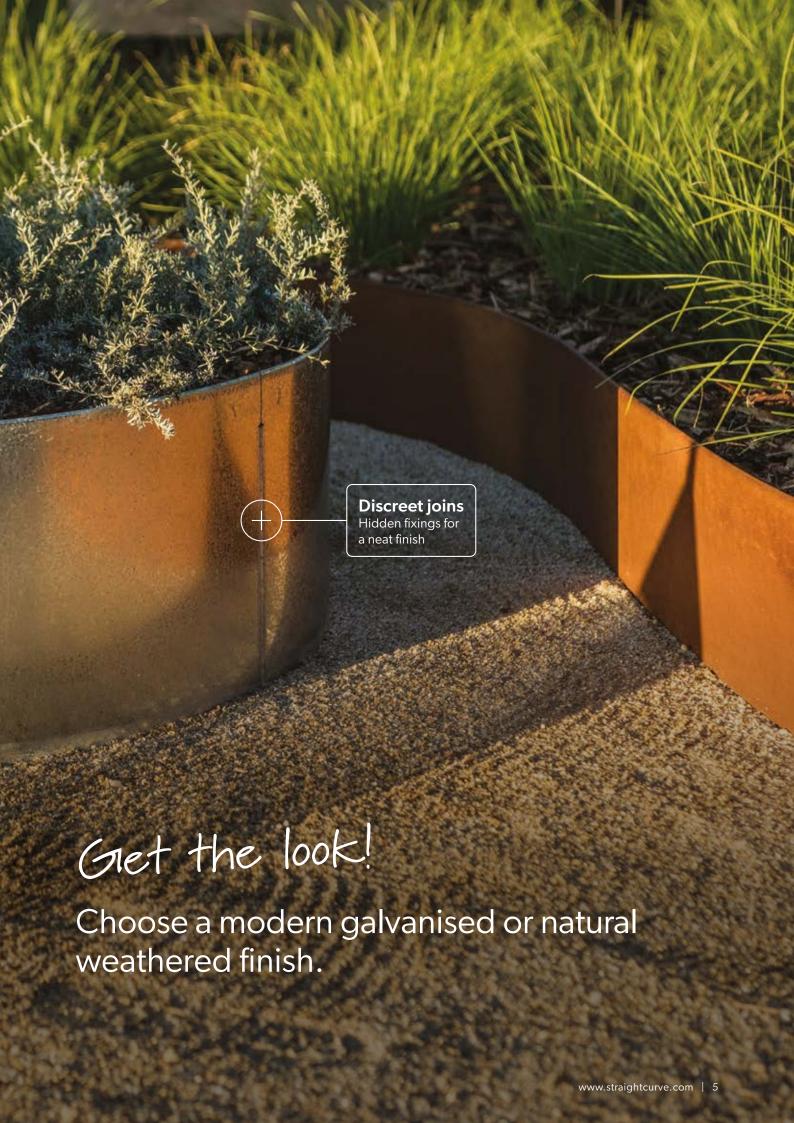

### WEATHERING STEEL

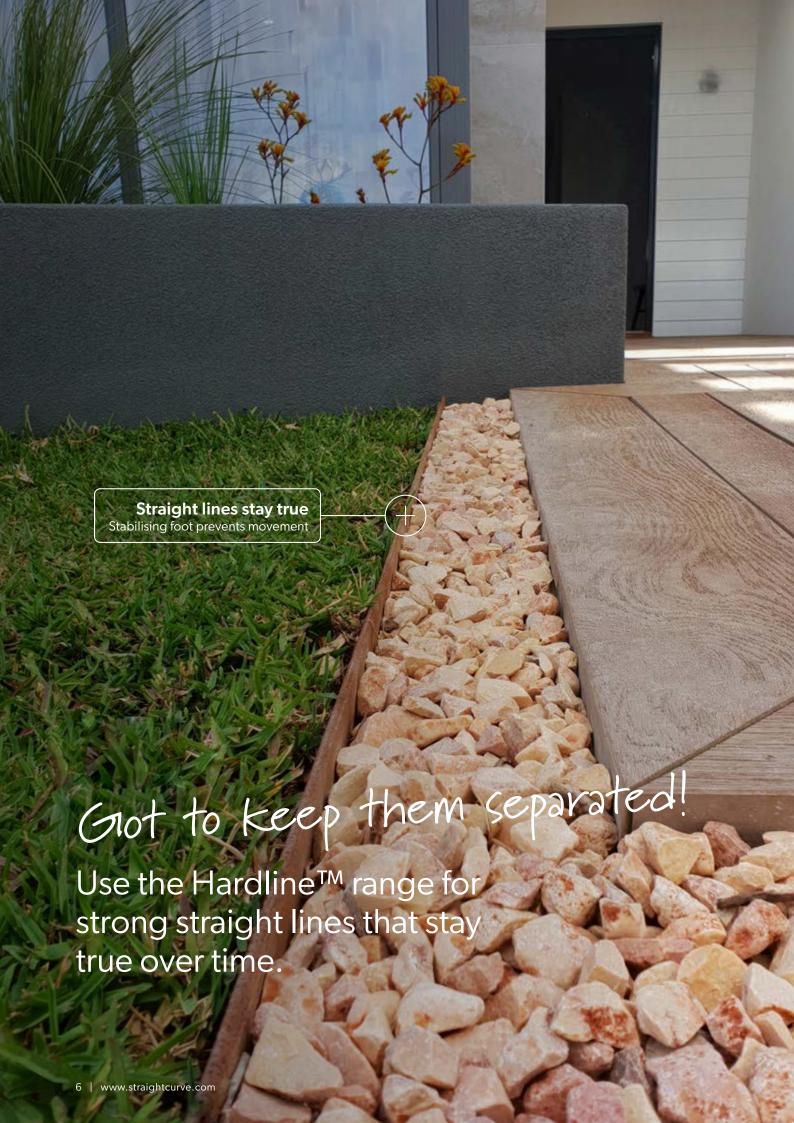

Weathering steel is an alloy that develops a rusty-looking protective patina, giving a natural finish.

### **GALVANISED STEEL**

The galvanised look is for people who prefer a grey/silver finish and is longer lasting.
