

Care of Analogy Fabric

Regularly wash it with Nikwax Tech Wash® to remove dirt and revive its water repellency. If, after washing, the outer fabric absorbs water (it does not run off in beads) it is time to reproof your garment with Nikwax TX.Direct®.

If your waterproof picks up a contamination which cannot be removed in a normal wash, Páramo can professionally wash and reproof it for you. Find out more [here](#).

What if I damage my Nikwax Analogy Waterproof clothing?

Simple repairs can be done with a needle and thread, without compromising waterproof performance. However, if you seriously damage a garment, our customer service team can provide you with a quote for having it professionally repaired.

For irreparable damage, you may be interested in Paramo's [Recycling Scheme](#).
