

ORA Clinic Skin Booster Pre Care

Skin Booster Pre Care

BEFORE YOUR TREATMENT

Please observe the following guidelines prior to your Profhilo, Redensity or Polynucleotide Skin Booster treatment.

Do not wear makeup on the day of treatment.

Avoid skin, beauty, aesthetic treatments (including but not limited to: eyebrow tinting, waxing, blading, facials, peels, microneedling, laser) for 2 weeks prior to your skin booster treatment.

Avoid alcohol for 24 hours prior to your skin booster treatment.

Unless prescribed by your GP or medical practitioner, avoid aspirin, ibuprofen, fish oils, vitamins A-E for 1 week prior to your treatment.

History of herpes or cold sores may require an antiviral prescription prior to treatment.

Do not attend for skin booster treatment if you have had a recent cold, flu, infection or vaccination. You must wait 2 weeks after any of these and be feeling well before having a skin booster treatment.

Familiarise yourself with the skin booster information provided in our client portal, the FAQ's and consent form. Please contact the clinic if you have any questions.
