

LETTERCUT

TEMPLATE FOR No. LETTERS
5" 8" + 12" CLASSIC Modern

INSTRUCTIONS:

1. Print templates as full size in printer settings.
2. Assemble template.
3. Tape the template in place. **Use a level to ensure your template is straight.*
4. Pre-drill the screw holes - using house numbers as a guide.
5. Fasten with screws through the number and spacer.

Lining your numbers up:

Solid lines on the top and sides of page mark the centers of the numbers so you can easily align your numbers vertically or horizontally. When you assemble your template - tape pages together so solid lines line up.

Heights vary slightly - Numbers and letters are all designed for visual appeal. A slight variation in number height and width is intentional.

**Because of size - 12" letters are printed on 2 or 4 pages.
Print pages and tape together with no overlap.
Center line is where pages meet.**

Spacing your numbers :

These dotted lines create even spacing of numbers
Fold template on the dotted line and tape papers together so dotted lines match.
**Easily add or subtract space by adding or decreasing space between dotted lines.*
