

# LETTERCUT

TEMPLATE FOR No. LETTERS  
5" 8" + 12" Roman Serif

## INSTRUCTIONS:

1. Print templates as full size in printer settings.
2. Assemble template.
3. Tape the template in place. *\*Use a level to ensure your template is straight.*
4. Predrill the screw holes - using house numbers as a guide.
5. Fasten with screws through the number and spacer.

### Lining your numbers up:

Solid lines on the top and sides of page mark the centers of the numbers so you can easily align your numbers vertically or horizontally.

When you assemble your template - tape pages together so solid lines line up.

*Heights vary slightly - Numbers and letters are all designed for visual appeal. A slight variation in number height and width is intentional.*

**Because of size - 12" letters are printed on 2 - 4 pages.**

**Print pages and tape together. No overlap where pages meet.**

### Spacing your numbers :

These dotted lines create even spacing of numbers

Fold template on the dotted line and tape papers together so dotted lines match.

*\*Easily add or subtract space by adding or decreasing space between dotted lines.*

# **LETTERCUT**
