

LEAF/BERRY STAINING - NATURAL STONE EXTERNAL

Always follow manufacturers guidelines – these can be downloaded from the relevant product page on our website. We always recommend conducting a test in a discreet area prior to a full application of the product. Wear appropriate clothing and protective wear, such as gloves and glasses.

Our range of natural stones are dense and hardwearing; however, it is necessary to maintain them correctly to keep them looking their best. There is no rule on the frequency, it comes down to usage and personal preference. Lithofin is our preferred brand for sealing and maintenance products. Their comprehensive range of products have been rigorously tested for their compatibility with both natural stone and porcelain for internal and external applications - as such, we have used and sold Lithofin's products to protect and maintain our products for over twenty years.

What you will need:

- Lithofin Outdoor Cleaner (approx coverage: 5 to 10m² per litre)
- Garden Sprayer
- Deck Brush
- Hosepipe

For stubborn dirt or stains (such as leaf tannins, berries and spore algae), we recommend using the Lithofin Outdoor Cleaner, designed to remove stubborn dark deposits. Begin by testing the product on two affected tiles using the below method. If stubborn stains remain, please contact the technical team at Lithofin who will be able to advise further.

1. Use a garden sprayer to apply Lithofin Outdoor Cleaner generously to the paving in undiluted form. The paving must be completely dry.
2. Allow the product to work for 2 to 10 hours depending on the stubbornness of the dirt deposits.
3. Brush the surface with a stiff brush and rinse with clear water. In very stubborn cases, repeat this procedure. Do not rinse Lithofin Outdoor Cleaner onto lawned or planted areas.

Please Note: test the product's suitability in an inconspicuous area prior to use. Shield treated surfaces from rain for approx. 4 hours. Protect plants, textiles, metals, wood, etc. The product will damage these surfaces.

Lithofin technical helpline: 01962 732 126

Always keep pets and children away from any treated areas until the product has been removed.
