

OCCASIONAL DEEP CLEANING - NATURAL STONE INTERNAL

Always follow manufacturers guidelines – these can be downloaded from the relevant product page on our website. We always recommend conducting a test in a discreet area prior to a full application of the product. Wear appropriate clothing and protective wear, such as gloves and glasses.

Our range of natural stones are dense and hard wearing; however, it is necessary to maintain them correctly to keep them looking their best. There is no rule on the frequency, it comes down to usage and personal preference. Lithofin is our preferred brand for sealing and maintenance products. Their comprehensive range of products have been rigorously tested for their compatibility with both natural stone and porcelain for internal and external applications - as such we have used and sold Lithofin's products to protect and maintain our products for over twenty years.

What you will need:

- Lithofin Power-Clean (approx coverage: 50 to 300m² when used diluted)
- Large Stiff Brush
- White Towel/Wet & Dry Vac
- Two Buckets (one for diluting product and one for rinsing)

For a deep floor clean, we recommend using the Lithofin Power-Clean, designed to remove stubborn dirt, oil and grease. Begin by testing the product on two affected tiles using the below method. If stubborn stains remain, please contact the technical team at Lithofin who will be able to advise further.

1. To work out the correct ratio of product to water for your floor, we recommend testing the product on a tile in a discreet area with a ratio of 1:10.
2. Apply generously and leave the product on for 8-10 minutes - scrubbing every minute with a stiff brush.
3. Rinse several times with clear water and towel dry before assessing the results.

If you are not satisfied, increase the ratio of product to water and test again, or speak with the technical team at Lithofin. We do not recommend using this product neat. Always work in small controlled sections (2-3m² at a time).

Lithofin technical helpline: 01962 732 126

Always keep pets and children away from any treated areas until the product has been removed.
