

The VersaCom Box provides a junction for electricity and cable hookups. This box can be put in virtually any location around performance areas of varying surfaces. The open bottom of the VersaCom Box provides adequate drainage and conduit entry, while the hand holes in the cover allow easy access. A removeable divider plate is also provided to help keep electrical equipment segregated. The main box structure is made of 1/4" thick folded aluminum. The lid and covers are constructed out of 1/4" aluminum plates for maximum support and durability. A tether keeps the covers attached to the box. Factory installed infill retainment brushes collect and keep turf infill out of the box.

Full Size Dimensions: 30" L x 18" W x 14" D with 1/4" wall thickness.
