

DFS – PVC SPIRAL REINFORCED CONDUIT

Product Specification Sheet

DFS conduit is an advanced product that is ideal for all general purpose applications where durability and high flexibility is required. With an all PVC construction with spiral reinforcement, DFS offers all-round protection and facilitates fast insertion of the cables (due to its smooth inner bore).

As a UL recognised conduit, DFS (A-series) will not support combustion is self-extinguishing and offers a high ingress protection of IP65 on all fittings, which can be achieved without the use of any tools.

Technical Details

Temperature Range:- 15°C to +70°C (static), -5°C to +60°C (moving) **Ingress Protection:-** IP65
Material: Thermoplastic resin with polyvinyl chloride (PVC) **Compression Strength:** 320N
Colour: Black **Certificates:** UL Recognised
Flame Resistance: Self-extinguishing within 30 seconds (UL94V0) **other information:** UV resistant, CE, Manufactured to BS EN61386
