THIS KIT IS NOT A TOY - NOT FOR CHILDREN UNDER 15 - CONTAINS SMALL PARTS - PERMISSION TO PRINT THESE FOR PERSONAL USE ONLY THIS KIT IS NOT A TOY - NOT FOR CHILDREN UNDER 15 - CONTAINS SMALL PARTS - PERMISSION TO PRINT THESE FOR PERSONAL USE ONLY

Before starting this kit, make sure you read through all the instructions carefully. Always remember to dry fit parts and sand as needed.

We use two kinds of glue when assembling our kits. Super glue (cyanoacrylate) or PVA glue.

You can repaint or weather our kits easily! The paint we use is a great base primer and will take paint nicely.

If you have any issues during assembly, please contact us and we'll always do our best to help. We pride ourselves on taking care of our customers, so if you need anything at all, we're here!

As part of the laser cutting process, some colors or sheets may have more laser dust/residue than others. This is due to a wide variety of reasons and its 100% normal.

If the smell bothers you, set the kits outside for a day or so. If the residue is getting onto your hands, use some gloves!

Some folks like to wipe the kits down with a very lightly damp rag.

IMPORTANT SYMBOLS YOU MAY FIND WHILE ASSEMBLING THESE KITS

ATTENTION: This is a specifically important step.

NO GLUE: When you need to place a part without glue. Working doors are a good example

USE GLUE: This one isn't used much, as we assume almost all steps will have glue. But sometimes we use this for additional clarity

TRIM/SAND: Sometimes parts need to be slightly sanded, or trimmed in order to get the perfect fit.

DRY FIT: Sometimes we'll tell you to test fit items first. While we suggest doing this for ALL steps. Some are more important.

EXTRA PARTS:

SOMETIMES OUR KITS MAY COME WITH ADDITIONAL PARTS, GREEBLIES OR FREE DETAILS. WE DON'T ALWAYS SHOW THESE PARTS AS PART OF THE INSTRUCTIONS BECAUSE THEY MAY SOMETIMES CHANGE BETWEEN EDITIONS OR MANUFACTURING RUNS.

IF YOU GET TO THE END OF THIS KIT AND THERE ARE PARTS LEFT OVER, SIMPLY DISCARD THEM, OR USE THEM TO KITBASH SOME COOL ADDITIONAL FLAVOR TO YOUR KIT!

Step 1:

Step 2:

Step 3:

Step 4:

Step 5:

Step 6:

Step 7:

Step 8:

Step 9:

Step 10:

Make sure these rails sit all the way into the back corners of the case!

Step 11:

Step 12:

If you want to magnetize the front lid, pop the small rectangles from the bottom of the case and push the magnet backers up from underneath

Step 13:

Step 14:

Step 15:

ALWAYS double check your polarity! It is best to have these magnets all 'facing' the same way.

Use the etch line in the black panel to help line up the red sheet.

Step 16:

The red side of this piece should be glued to the black piece, so that the logo on the front of the case shows red

Step 17:

Step 18:

ALWAYS double check your polarity! Make sure these magnets will stick to their counterparts on the main body of the case!

Step 19:

The elastic band can be glued with CA glue or white glue!

Step 20:
