

FabBrix pieces are made of wood. If placed in water or very high moisture is present in the air, bricks can lose or alter function.
 Important Notice: Due to the high precision wood cutting techniques, at first use the bricks may have a tight fit. This may make it harder to connect and disconnect them. This will subside after a few uses.
 Do not get them wet. Keep away from water.
 WARNING: CHOKING HAZARD Small parts.
 Not for children under 3 years.
