

SIENNA

Stainless steel sliding bar system for wooden doors weighing up to 120kg

Sienna is an elegant sliding system that creates a minimalistic and stylish look. It is designed to accommodate wooden doors of between 30 - 70mm thick and a weight capacity of 120kg. The systems rollers are expertly engineered to effortlessly run along the brushed stainless steel 304 (A2) tubular track and stops are positioned on the track to limit the amount of door travel. For bi-parting doors, two kits can be purchased.
