Introducing Cantoni Italian Craftsmanship

Founded in 1996 Cantoni was conceived from an idea from a photographer and a make-up artist. When working together backstage during events and shows they often found themselves working in inappropriate conditions. They came up with a solution that allowed them to present themselves in a professional manner and work efficiently.

The first model of their “cases with legs” was launched at Cosmoprof in Bologna in 1997 and attracted the attention of names such as Dior and Helena Rubinstein, renowned trend-setters in the beauty industry.

Over subsequent years, Cantoni has become the brand of reference for portable make-up stations and has acquired important partnerships in Japan, Russia, Romania and the United Arab Emirates. Cantoni has increased its range year on year, adding increasingly technologically advanced products to meet the needs of various professional categories.
