Stop

IntelliPup will immediately stop any action currently being performed

Touch mode

IntelliPup will act cute when touching the top of the head.

Troubleshooting Issues

Common Problem	Solution
Nothing happens when IntelliPup is turned on	Check whether the battery is properly connected or the battery charge level is too low
The remote control doesn't work	Make sure the remote has new/charged batteries. Make sure the controller is being aimed at IntelliPup's signal receiver. Bright sunlight will affect the remote's ability to work
IntelliPup doesn't work with remote	Make sure IntelliPup's battery is fully charged. Low charge levels will cause poor functionality.

Battery Warnings

1. There is a certain risk of using lithium batteries, which may cause significant damage to people and property. The end user must use it carefully and bear all the related responsibilities.
2. If the battery leaks, avoid contact with skin and eyes. If contact with skin occurs, wash with soap and water immediately. If contact with eyes occurs, rinse immediately with cold water for at least 15 minutes, and seek medical attention.
3. If the charger begins to emit a suspicious odor, noise, or smoke, unplug the power supply immediately.

Battery Charging

1. The **light turns on** when **charging** and turns off when it is fully charged.
2. Use only the original factory cable. Do not use damaged or cable of other brands.
3. Do not charge expanded, leaked, or damaged batteries.
4. Do not overcharge the battery. When the battery is fully charged, unplug the device.
5. Do not charge near inflammable materials (eg. carpets, wood flooring, solid wood furniture, etc.).
6. Do not charge the battery immediately after it has become hot.
7. The charging temperature of the battery should be between 0-40°C (32-104°F).
8. Recommend using a 5V 1A charger (Not included) for charging.

Recycling

This equipment consists of electronic components or batteries. For electronic waste, please dispose of according to local waste disposal laws and ordinances.

Charging Time

New Battery needs to be fully charged for **60-80** minutes and use time is up to **30** minutes.

Low Power Indications

If the IntelliPup's voice is quiet, the lights are dim, or some of the functions aren't working properly, IntelliPup may not have enough power and may require charging.
