

Why A Rhino

Tougher

Our Rhino's are designed for rugged terrain. They are **STRONG, LIGHT** and **COMPACT**. They are dust proof, water proof and rust proof. Our fibreglass technology is behind this. Fibreglass has a **superior strength to weight ratio** to steel or aluminium. We take this one step further as-well by using a fiber-reinforced polymer (FRP) sandwich system in all of our campers.

More comfortable

With limited power off-road, you rely largely on the insulation of your tiny home to stay comfortable. Unlike aluminium or steel, fibreglass is not a heat conductor but an **incredibly effective insulator!** Our shell consists of a 15mm multilayered system which keeps you cool in summer and warm in winter.

Customizable

No-ones journey in the outback will be the same and our campers are designed to accommodate accordingly. The **SIMPLE DESIGN** of our campers enables us to **easily customise** them to ensure that you are equipped for whatever you have planned.

Affordable

Our campers range starts at under 20k with our standard inclusions. Our base models are designed to be affordable and with **plenty of options to upgrade**, there is a camper for pretty much anyone.

Easy to use and maintain

Our campers are designed to be simple and easy to use. **With zero set up**, anyone, anywhere can have a hassle free trip. Since our campers don't rust and have on separate trailer to worry about maintaining, they are the easiest on the market to maintain.

Rhino Compact

Our Rhino Compact's come in either a 2.1 or 2.4 configuration to suit any tray size. Complete with a kitchen, double mattress, ample storage and a handy 12v set up in both the sleeping and kitchen areas, this camper has everything you need to go off road. This model is light (the 2.1 weighs just 300kgs), has a low profile and has no canvas or aluminium, which gives it one of the highest thermal capacities on the market. The camper is also one of the most affordable on the market! This model is perfect for anyone looking to go off-road or simply looking for an affordable second home which is easy to store and take out when the wind calls!
