THE FUSION LINE

WHERE PERFORMANCE MEETS COMFORT

Performance products for active wear, ready to wear, and tailored clothing. Bringing comfort and ease to all garments.

SINCE 1945

Since 1945, DHJ is a renowned manufacturer of shirt interlinings.

Our worldwide network enables us to offer consistent products and services all over the world.

LAINIERE PARIS

MADE IN FRANCE

For more than a century we have been a key player in Haute Couture.

Lainière Paris has a leading position in the Parisian market and is a world leader in knitted interlining products.

Everything is produced in our historic factory Lainière de Picardie outside of Paris.

INSIDE THE BRAND THAT IS INSIDE THE WORLD'S BEST BRANDS

BERTERO
PREMIUM TAILORING

Bertero was born in 1907 in Vinovo, Italy, and has represented excellence in canvas production for more than 100 years. Bertero continues to be the reference for suiting components for the world's most discerning brands.

SUSTAINABLE 360™

FULL-CIRCLE COMMITMENT

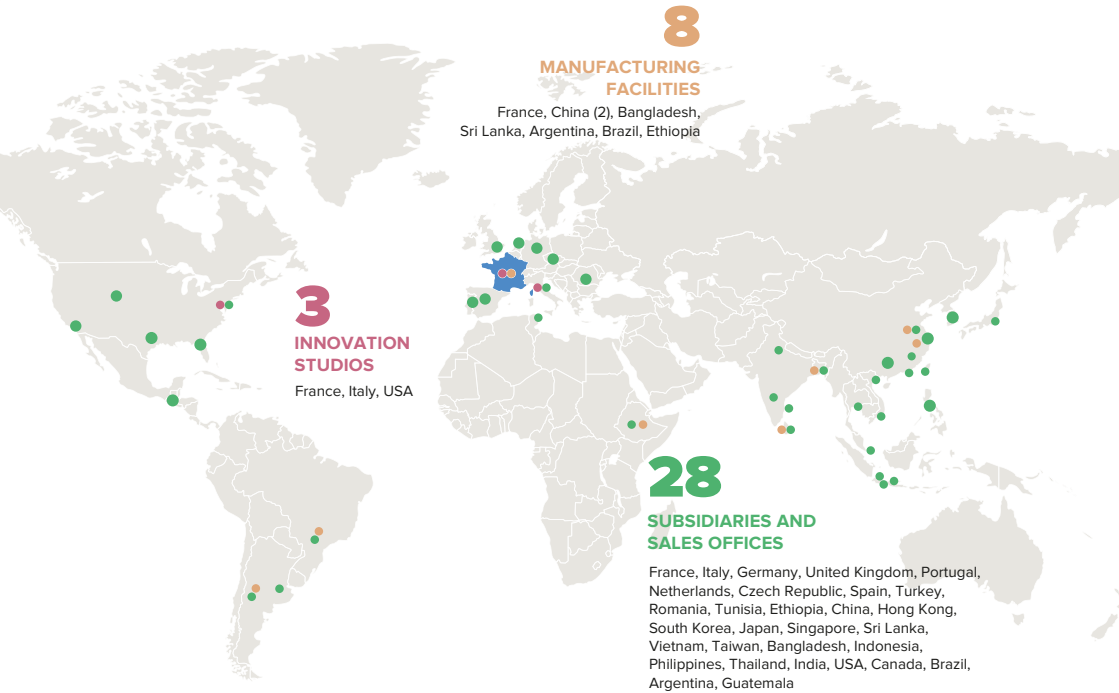

More than 300 articles using only eco-responsible materials, including BCI cotton, GRS-certified recycled polyester, hemp, and more.

First complete collection of both interlinings and inner components such as shoulder pads, canvas chest pieces, and undercollar felt.

We are constantly working to reduce our carbon footprint and our waste.

DIGITAL INITIATIVES

Fashion is getting increasingly more technical, and Chargeurs PCC is leading the way in the world of inner components.

3D

The Modern Way to Reduce Waste In Design

We are the only inner component maker to partner with a 3D design software company to offer designers digital interlinings.

These digital assets can:

- Speed time to market
- Reduce waste and resource usage
- Eliminate the need to create and ship as many physical samples.

The Fusion Line Virtual Showroom

The Fusion Line Virtual Showroom provides customers round-the-clock access to our products in a fun and interactive way and links directly to the CLO 3D marketplace.

Our Digital Inner Component Library

“ By adding Chargeurs’ interlining products to our platform as digital assets, we will help companies shorten their lead times by making the design process more efficient and comprehensive, eliminating miscommunication and guesswork, and reducing waste and energy usage associated with physical sample making and shipping. ”
