OPENS  
THE WAY  
TO YOUR  
LAVISH  
BATHROOM

Established in 1988, Onidalbibo has solidified its position as a premier brand in the faucet industry by seamlessly merging innovation with timeless elegance. With a relentless pursuit of excellence, they employ cutting-edge technology, such as their in-house PVD coating plant, to uphold the highest standards of quality in their meticulously crafted products. Their unwavering dedication to customer satisfaction is reflected in their client-centric approach, ensuring that each interaction exceeds expectations. Rooted in Indian culture and values, Onidalbibo products not only showcase exquisite craftsmanship but also resonate with a global audience, making them a trusted choice for discerning customers worldwide.

## What Makes Onida's Faucets One-of-a Kind?

Brass ingots

Brass Extrusion  
forging divertors

Optimum  
Electroplating

Durable for  
5 lacs cycle test

Zero Dip  
Technology

LowFlow  
Capable

8 Years  
Warranty

Trained Service  
Personnel

## PRODUCTION

Always committed to interpreting new tastes and trends, ONIDA FAUCETS looks to the future with continuous innovation of its process and products. This requires the integration of different skills, from the design to engineering, from chemistry to logistics, from marketing to sociology. The company has always paid great attention to saving energy and protecting the environment.

It is constantly evolving in order to continuously improve the functional performance and aesthetics of its collections. The wide range of shapes, sizes, colours and methods of installation of its products allows satisfying the different tastes and requirements of customers in a safe and precise manner.

# GO GREEN !

## Technology that saves water

This is a revolutionary technology that lets your taps and shower save upto 80% of water without compromising of flow. Flow Restrictors adjust the flow in both low and high pressure conditions and offer the same voluminous flow every time.

Companies / Buildings aspiring to obtain "GREEN CO / IGBC / LEED / GRIHA / IAPMO" rating systems need to cover all aspects of environment such as energy, water, greenhouse emissions and waste handling. We play a major and an active role on the aspects of water usage management by helping you arrive at water conservation figures directly at the dispensing source of water.

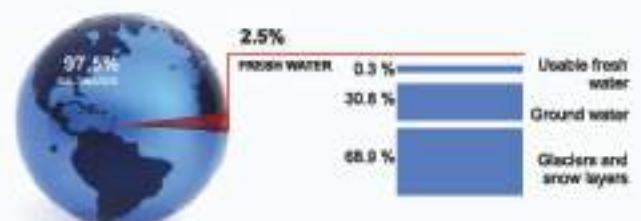

**onida ibibo**  
Bath Accessories & Faucets

Flow rate options available :  
1.4, 2.5, 4.0, 6.0, 8.0, 13 LPM

- The unique flow regulator technology keeps the flow rates constant as per pre-chosen flow rates, independent of the line pressure.
- The unique flow regulator technology keeps the flow rate constant, independent from the line pressure (e.g. at 6 liters/minute when washing your hands or 12 liters/minute when taking a shower). Consequently, the use of flow regulators not only saves a lot of money, but also guarantees an even water distribution.
- Due to controlled flow rates of each water dispensing device the life of the water fittings gets enhanced and risks of water leaking or hose bursting become minimal.
- Final outcome is to save & reduce wastage of water from source.

Hardly 1% of the worldwide water quantity can directly be used as drinking water !

## CONSUMER GUIDELINES

Consumer satisfaction is our basic motto, our objective and our belief with **ONIDA IBIBO** products.

The following guidelines, when followed by plumbers & consumers, ensure optimum and trouble-free performance of our products for years to come.

- Supply pipelines should be laid straight and vertical keeping the number of joints to a minimum-keeping the number of bends/elbows etc also a minimum possible to avoid restriction to flow of water.
- Supply lines must have vent pipes for removing air-locking in the water supply lines so as to get smooth flow water through the fittings.
- Flush all pipe lines before starting installation of metal fitting so that dirt and other foreign particles should not spoil the metal fittings.
- All tiling work should be fully completed before installing metal fitting.
- To protect the finished taps and fitting from dirt, stains and other damages, cover them with polypack/cloth after their installation till they are put to actual use.
- Clean the aerator at regular intervals of time for free flow of water from the fitting. Weekly cleaning may be better.
- Please buy Spare Parts from authorized dealers only to ensure genuine quality material.
- To retain the original shine & sparkle, Onida ibibo fittings needs a certain amount of care.
- Don't use aggressive cleaning agents, since these may spoil the finish of your Onida ibibo fittings.
- Don't use salt or vinegar based cleaning agents to remove scale or scale related agents.
