

Factory X's results 2018/2019

Factory X produces its range in 43 first tier factories. We have also traced 18 factories in our second-tier supply chain. One factory in our 2nd tier supply chain was audited in 2018. (Audit is valid 2 years)

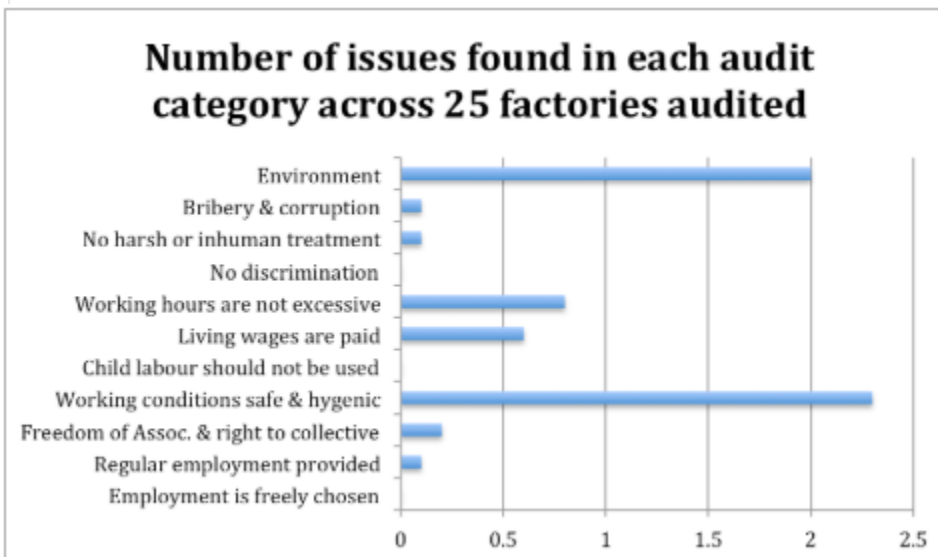

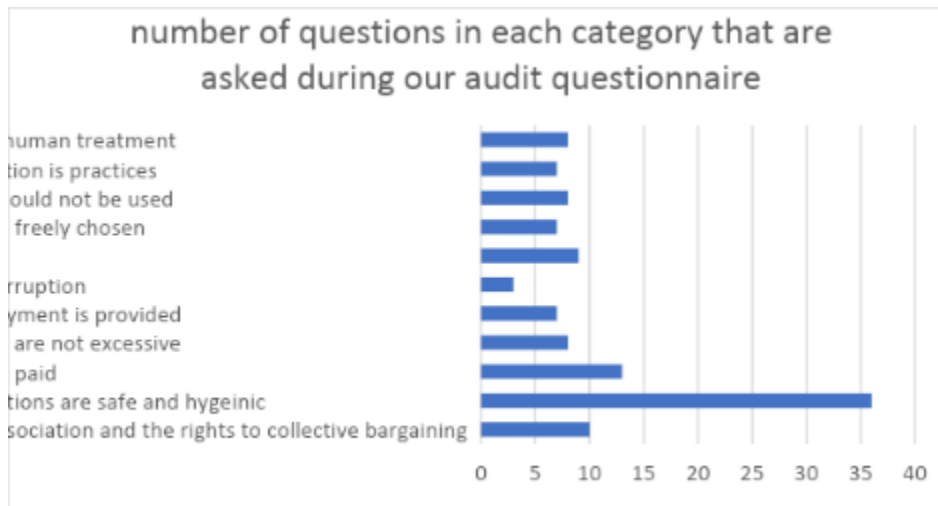

67% of our first-tier factories have undergone either a 3rd party audit by Qualspec or an audit by a trained Factory X auditor. Which is an overall increase of 16% more than last year.

The chart below provides an overview of the audit results from the audits conducted:

Overview of issue level

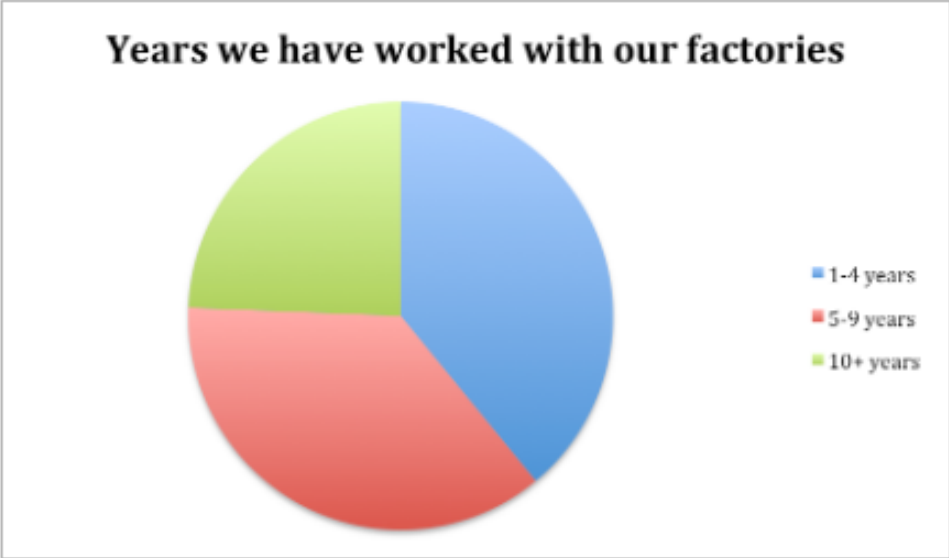

This chart below provides an overview of the number of questions in each audit category in our audit questionnaire.

The issues identified pertaining to the environment, bribery and corruption, harsh and inhuman treatment, safe and hygienic working conditions, freedom of association and freely chosen employment were resolved within the specified timeframe. We are still working with factories to resolve several of the issues related to working hours and wages.

Maintaining consistent relationships

Factory X is committed to maintaining long-term relationships with our manufacturers. The table below provides information about the length of time we have been working with our factories.

In 2019, Factory X used 43 first tier factories and we traced 14 second tier suppliers. With the exception of socks (Taiwan), and leather goods (Pakistan) all our products are made in China (5 regions) & India (2 regions).

[A list of our factories is available here.](#)

The Chart below shows the proportion of products made in each country.
