

dapol 00/H0 TRACKSIDE MODEL C006: SIGNAL BOX

Made in the UK
using recycled plastic

Not suitable for children
under 14 years old

Please Note - The tools used to produce this model were made over 50 years ago. Over the period, changes have been made and it may be that reference numbers moulded into the plastic parts do not match the numbers used in these instructions. Therefore we advise you to FOLLOW the exploded diagram and instructions.

ASSEMBLY INSTRUCTIONS: It is recommended that the instructions and exploded view are studied and that the assembly is practiced before cementing together. Certain parts may need to be trimmed and may best be painted before cementing.

WARRANTY:

Parts can get bent during transit or by prolonged storage. However misshapen parts can be straightened by placing them in hot water to soften the plastic and then carefully manipulating them back into shape by finger pressure. Please be careful that the water does not cause harm to skin or fingers. In the event of parts being broken or missing, then you **MUST** return to the place of purchase (the seller). The seller will replace your kit and return the original kit to Dapol under their agreed contractual terms. Do **NOT** return to Dapol.

Please note that Dapol does not keep individual parts for any kit.

To apply transfers first cut the sheet into separate subjects. Then dip each in warm water for a few minutes. Slide off backing sheet and apply to building as identified. Allow to dry.

1

1: Cement window (1) into opening in front wall.
2: Cement all four walls (2 - 5) together to form the basic shape of the structure.

2

3: Slot overhang roof (6) over the four posts as shown and cement.

3

4: Cement solid side wall (6) and rear wall (8) onto the insides of the corner posts as shown.

4

5: Cement windowed side wall (7) and front wall (10) onto the insides of the corner posts as shown.
6: Cement doors (11 & 21) into place as shown.

Large transfer fits here

5

7: Cement the two roof finials (15 & 17) into the holes in the roof.
8: Cement stove chimney (16) into the hole in the roof.
9: Cement bottom edge of drainpipe (12) into the hole on the roof overhang.
10: Cement complete roof onto walls as shown ensuring that the top of the drainpipe (12) is positioned at the roof edge.
11: Cement hanging sign (17) under edge of roof as shown.

Note* Small transfer fits onto this signboard.

6

12: Cement handrails (18 & 20) to stairs (19).
13: Cement complete structure to Signal Box noting that the top of the stairs cements to the roof overhang and the tops of the handrails attach to the corresponding holes in the wall of the building.
