

RECOMMENDATIONS + DETAILS

For standard kiln stand.

It is recommended to assemble the stand on a protected surface to prevent scratches or damage to the components.

This guide is for the standard configuration. Other configurations can be created by moving steps 2- to the center or bottom sets of holes shown at the end of this guide

PARTS INCLUDED

- 4 Stand Legs (A)
- 2 Side Rails (B)
- 2 Face Rails (C)
- 1 Solid Shelf
- 4 Caster Wheels
- 48 Allen Head Bolts
- 48 Star Lock Nuts

HOT SHOT®

STEP 1:

Remove all parts and hardware from the packaging. Be sure to only tighten the bolts "finger tight" until directed to tighten them all the way.

STEP 2:

Lay out 2 Legs (A) and attach 1 side rail (B) to the corners of each leg (A). Do this to create 2 sides of the stand.

STEP 3:

On one side from step 2, attach the Face Rails (C) in the opposite corners from the (B) rails.

STEP 4:

Attach the other side from step 2 to the open ends of the Face Rails (C) to create the frame of the stand.

STEP 5:

Insert the Solid Shelf between the legs at an angle and slide it to the desired hole locations.

STEP 6:

While the stand is still on its side, install the 4 caster wheels to the bottom of each leg with the supplied hardware and tighten the bolts.

STEP 7:

Lock the caster wheels, and carefully tip the stand up to its functional position.

STEP 8:

Once in the functional position tighten the remainder of the bolts.
