PREPARATION

1. Fill the kettle with at least 1 litre of fresh tap water (do not use water that has been boiled before).

2. Boil the water. Boiled water should be used immediately. Take care when handling freshly boiled water.

3. Clean and disinfect the surface you are going to use.

5. If you are using a cold-water steriliser, shake off any excess solution from the RapidCool", bottle and the teat, or rinse them with cooled boiled water from the kettle (not tap water).

4. It's important that you wash your hands.

6. Stand the RapidCool[™] on the cleaned, disinfected surface.

MAKING THE FEED

8. Follow the formula manufacturer's instructions and pour the amount of boiling water you need into the RapidCool™. Double check that the water level is correct. Always put water in the RapidCool™ first, while it is still hot, before adding the add milk formula from milk powder dispenser.

provided. Different tins of formula come with different scoops. Make sure you only use the scoop that comes with the formula. Empty each levelled scoop into the milk powder

9. Screw the digital lid onto

the RapidCool[™], ensuring it is

7. Loosely fill the scoop with formula

powder, according to the

manufacturer's instructions, then level it using either the flat edge of

a clean, dry knife or the leveller

fully tightened. **10.** Shake the RapidCool $^{\sim}$ well to ensure formula powder is fully dissolved.

RAPIDCOOL™ RESET TIMES

Sterilisation/Cleaning Method	Reset Time*
UV Sterilisation**	3 hours
Cold Water Sterilisation**	3 hours
Steam Sterilisation	4 hours
Dishwashing Cleaning	3 hours

* when sterilised immediately after use

[08]

 ** these sterilisation methods do not generate heat and therefore do not activate the flask. If RapidCool $^{\text{\tiny TM}}$ is cool to the touch, it can be used

RapidCool $^{\text{\tiny{TM}}}$ works by absorbing heat from hot liquids. After being exposed to heat, it will require a minimum of 3 hours before being ready to use again.

11. Before dispensing into a bottle, invert the RapidCool™ and hold it in that position for a minimum of 5 seconds to allow the integrated thermometer to adjust to the milk temperature. Touch the circle on the digital screen to activate the Nuby logo.

02

14. Test the temperature of the formula on the inside of your wrist before giving it to your baby. It should be body temperature, which

15. If there is any made-up formula left in the bottle after a feed, throw it away. Clean all parts thoroughly & sterilise immediately after feeding.

means it should feel warm or cool,

12. When the Nuby logo shows green, the feed is at the correct temperature to dispense. Empty the contents of the RapidCool into a clean, sterile bottle

13. Fit teat into retaining ring, taking care to avoid unnece contact with teat nipple, and screw retaining ring onto the bottle base.

DIGITAL LID

Activate the digital screen by touching the circle. This will show the Nuby logo in a specific colour. The table below describes what each

Green	Amber	Red
Feed has cooled to correct temperature and is ready to dispense	Feed is too hot to dispense, please wait	Feed is too hot to dispense, please wait

Under most circumstances, the digital lid will not show a red light when attached to the RapidCool[™]. This is because the RapidCool[™] starts cooling water immediately and brings the water temperature below the range that would show a red light.

COOLING TIMES

Cooling times should be used as a guide only. Always check food temperatures before feeding. Always follow formula powder manufacturer's instructions for making a feed.

Feed Size (ml)	Water Volume (oz)	Time to Cool (mins)
90	3	2
120	4	2
150	5	3
180	6	4
210	7	5
240	8	5

STORAGE

but not hot.

- Do not store in direct sunlight or near a source of heat.
- Do not store with or allow to come into contact with solvents or harsh chemicals.
- Keep all components not in use out of reach of children.
- · Do not leave in direct sunlight or heat, or leave in disinfectant ('sterilising solution') for longer than recommended as this may weaken the product.

WARNING!

- · Adult use only.
- Inspect before use. Throw away at first signs of damage or weakness.
- temperature before serving.
- Always check food temperatures before feeding.
- · When making up a feed, follow the formula milk manufacturer's
- instructions.
- Please keep out of reach of children. Do not use in microwave oven.
- Do not use with any other liquid than water.
 Using RapidCool™ shortly after heating in any way may cause excessive external temperatures and risk of burns. Always allow
- RapidCool™ to reset before use and handling.

 Handle freshly boiled water carefully. Handle RapidCool™ carefully as the bottle base will heat up when in use. Do not prepare feed directly next to baby. Leave RapidCool $^{\text{\tiny TM}}$ to cool after steam sterilisation.

DISPOSAL

At end of life, dispose of whole product. Do not attempt to remove battery. Contact local waste authority for advice on disposing of electrical goods.

NHS GUIDELINES

Always prepare a feed to NHS guidelines

Preparing A Feed

Important – Ensure the RapidCool", flask lid, feeding bottle and parts you plan to feed with have been cleaned and sterilised before use.
