DRYSEE

DrySee's patented waterproof bandages provide a secure, waterproof covering for wounds. If water or other liquids make their way into the bandage, the gauze of the bandage will turn to a dark blue color. The color change alerts the user to change the bandage, knowing that the perimeter seal is broken and the wound could be contaminated. DrySee's liquid intrusion alert takes the guesswork out of replacing bandages because it is easy to see if the bandage is wet or dry.

POOLSIDE BY CGT

The Silver Antigua floor is a modern quartz print, designed to give pool water a serene, light crystal blue appearance. The Silver Antigua captures the soft details found in natural quartz pebble and is available as an all-print design or can be paired with the new Silver Horizon border design. Printed on a silver-gray pool liner base material, this design complements today's popular deck and coping treatments, the company says. Silver Antigua vinyl-liner material uses CGT's Poolside exclusive aquafinish protective topcoat that provides superior chemical resistance and UV protection.

POLARIS

The Polaris Prestige Filtration System Pack consists of the Polaris Prestige Filter and Polaris Forza pump. Offering the ideal mix of reliable operation with minimal maintenance, the Prestige system provides high-performance filtering capabilities to keep pool water clean and can easily be installed to get the swimming pool up and running as soon as possible, the company says.

NATIONWIDE INDUSTRIES

The Gate Saver Pro 2.0, like the original Gate Saver Pro, now accommodates vinyl gates to prevent and fix sagging with just a twist of the aluminum brace. Available for gates 36- to 72-inches, this product is quick and easy to install in three simple steps. Available in white and black aluminum for both wood and vinyl gates, the Gate Saver Pro 2.0 brace requires zero gate maintenance, the company says.

RAINBOW OUTDOOR FURNITURE

Pelican Reef Inc., DBA Rainbow Outdoor Furniture North America, a commercial grade Turkish outdoor furniture brand, has launched for the first time in the U.S. following Europe and Asia. The resin and aluminum products have been designed and inspired by modern and linear elements, applying only fine gas injection machinery with 100% polypropylene materials to produce lightweight, resistant, and contract functional styles, the company says. Rainbow products will survive the harshest all-weather conditions, are safe for the environment, and can be 100% recyclable.

MIST COOLING

This innovative swimming pool cooler was designed to solve the problem of hot pool water: It helps drop temperatures by 8 to 10 degrees and provides fresh oxygen. This product is easy to install, has zero operating cost, is maintenance free and inexpensive to operate, the company says. It does not require any power, Freon or gas to operate — just attach it to the pool return jet fitting.
