

Molift Mover 300

With its high lifting capacity Molift Mover 300 is the perfect solution for hospitals and care facilities. It has tall lifting height, and can therefore lift from the floor up. The lowest weight in its category in the market combined with the superior wheel positioning makes the Molift Mover 300 incredibly easy to maneuver. The low chassis, only 11 cm, together with the electric leg positioning provides for easy access.

Properties

- High lifting capacity – 300 kg
- Fits easily under furniture and beds
- 4-point suspension with rapid connection system
- Automatic service notification
- Environmentally friendly batteries

Molift Mover 300

The Molift Mover 300 is easy to clean and disinfect. Molift Mover 300 is supplied with 4-point suspension as standard. Used together with a Molift Sling, it provides comfortable and correct positioning from lying- to- sitting and vice versa. Molift Mover 300 can also be supplied with alternative suspensions to produce a quick coupling system that facilitates quick and simple switches.

Molift Mover 300 is equipped with automatic service notification. This consists of integrated software which calculates when the lifter requires a service, as well as produces statistics on the user's lifting patterns. It is also equipped with electronic and manual emergency lowering and emergency stop.
