

Regatta Thermo Cruise

Following the tragic Estonia-accident in 1994, the Norwegian Maritime Directorate encouraged all producers to undertake research and develop a lifejacket with thermal properties. Regatta AS took the challenge, and could launch the world's first thermal lifejacket after two years of developing and testing: the Regatta Thermo Cruise. The lifejacket protects against drowning, initial cold-shock and prevents hypothermia, and protects vital organs and gives a feeling of safety.

Regatta Thermo Cruise

- Easy donning - as a jacket
- Outer material of strong polyester
- "Beaver tail" with click buckle, hood, ¾ sleeves and lifting straps on shoulders
- High visibility due to fluorescent orange and yellow fabric
- Allows freedom of movement and provides the wearer with a good view of the surroundings
- Adjustable belt with click buckle, whistle and pocket for light (extra accessories: wateractivated or manual light)
- Thermo Cruise baby has mothersline with click buckle for fastening to an adult person
- Can be delivered in fluorescent yellow to Crew members with or without print of "Crew" on the back
