

PRODUCT DESCRIPTION

FIVE PRINT00 (semi-matte) and FIVE PRINT01 (matte) are polyurethane white film printable with solvent, ecosolvent and latex inks suitable for heat transfer in only 4 seconds on cotton fabrics, polyester and acrylic garments.

Thanks to its self-adhesive PET film carrier even very small letters and logos can be easily cut by all current cutting plotters after the printing process.

We recommend using BF MYLAR as a transfer tape and as a protection during the heat transfer, and then remove it while hot.
