

# BEAVER WAX

HAND POURED IN CANADA

2019/20

## ABOUT:

"Most ski waxes contain toxic compounds. BeaverWax's handcrafted ski and snowboard waxes, however, nix the fluorocarbons and Teflon in favor of natural ingredients like vegetable oils. These waxes come in a variety of temperatures, speeds, and yummy scents like wintermint and vanilla." -Sierra Club Magazine

BeaverWax was created in Oakville, Ontario, Canada, in a local candle factory. Later moving to Vancouver, British Columbia, Canada, Matt Turner understood the process and future developments of snow wax and wanted to create a wax that was more environmentally sustainable without compromising performance. An innovative paraffin wax containing environmentally friendly additives and the unique hand poured manufacturing process that is done in small amounts, ensures that each bar of wax stays consistent with the right amount of additives.

Today, award-winning BeaverWax is regarded as one of the finest qualities of wax on the market. It has set new standards for the recreational wax industry and continues to improve the quality for its environmental sustainability. BeaverWax has produced wax for numerous brands like Oakley, Arc'teryx, G3, Ride Snowboards, Rome Snowboards and Nitro Snowboards to name a few.

## FUTURE:

BeaverWax is working with a new technology that stabilizes organically produced oils by removing the oxygen and recombining the molecules. The electro-chemical process is designed to minimize environmental impact while creating products superior to those derived from petroleum. We will continue to product test through 2020 and hope to have these waxes on the market by 2021. All waxes are made and poured in Squamish, British Columbia, Canada.

## ADVOCATES:

Devun Walsh, Dustin Craven, Marie-France Roy, Frank April, Zac Marben, Chris Rasman, Jesse Paul, Jody Wachniak, Blair McKinney, Finn Westbury, JJ Westbury, Caleb Chomlack, Truth Smith, Neko Reimer, Malcolm Eppinger.

New Wax Job. Leaves A Pleasant Scent.

80Z

# “THE SEASON IS TOO SHORT FOR SLOW BASES” - BEAVERWAX

### SKI & SNOWBOARD WAXING IRON

Temperature range of 140-374° F (60-190° C).  
Small and compact for easy travel.  
102-127V or 220-240V for International compatibility.  
Comes with BeaverWax embroidered bag for storage.

### BEAVERWAX NYLON BRUSH

Key Features:  
Used to remove excess wax from the base after waxing.

### DAM COOL TRACTION PADS

Key Features:  
Eva Foam with added grip texture.  
Strong 3M Adhesive.  
4 beavers per pack

### DIECUT STICKERS

Key Features:  
Made in Canada

### BEAVERWAX EDGE TUNER

Key Features:  
Easy to use sharpener offers the choice of a 0 or 2 degree bevel.

### EPOXY

Key Features:  
Extra fast setting 2 part epoxy:  
3-5 minute working time.  
Extreme strength: 2,400-3,200 psi.  
Dries clear and does not shrink.  
Each pack has 3.5 grams of epoxy.  
2-Year shelf life.

### CLASSIC TEE

Black/ White print  
Graphite Heather/White print

### STACKED LOGO

Black/ White print  
Graphite Heather/White print

### THE TORQUE DRIVER

Key Features:  
6 piece ratchet driver  
#2 and #3 phillips  
#3 posidrive  
3/32" hex  
1/4" flat head  
8mm and 10mm wrench

### MINI CABLE LOCK

Key Features:  
Set your own combination  
Compact 3-digit combination  
Mini Lock - 23.62" [ 60cm] retractable cable

### TRIANGLE SCRAPER

Key Features:  
Multiple scraping sides  
Small and easy to use

### 8" FILE

Key Features:  
De-burring file for side edges and contact points.  
Strong and very durable

### WAX KIT

- Wax Kit Includes:
- Branded Bag
  - Torque Driver
  - Triangle Scraper
  - Nylon Brush
  - Mini Beaver Traction Pads
  - 95g All Temp Wax
  - 95g Cold Temp Wax
  - Die Cut Sticker

### THE SCRAPER

Key Features:  
10" [ 25cm ] wide for full width scraping  
Ideal for snowboard wax removal

### TUNE KIT

- Tune Kit Includes:
- Branded Bag
  - Torque Driver
  - Rectangle Scraper
  - Nylon Brush
  - Edge Sharpener
  - File
  - Waxing Iron
  - Epoxy Pack
  - Mini Beaver Traction Pads
  - 155g All Temp Wax
  - Die Cut Sticker
