The DISHNON is a small meter, which is resistant to fertilizer and similar chemicals and which transmits electrical data to automated control systems. The DISHNON contains a small measuring chamber and a magnetic proximity switch made of synthetic polymers and metals capable of withstanding all fertilizer materials currently in common use.

## Features

- Compatible with virtually any type of automated control system
- High accuracy
- Dry contact electrical output
- Corrosion resistant plastic and metal components

Applications
Automated irrigation systems
Automated industrial applications using corrosive liquids
