CONNECTING AND DISCONNECTING THE XLR CABLE

- Insert the Female XLR connector to the microphone by aligning the 3 pins of the microphone to the 3 holes of the XLR. Push in until you hear a click.
- To disconnect the XLR connector from the microphone, simply press down the **TAB** of the connector and pull away from the microphone.

Female XLR connector

HOW TO AVOID A FEEDBACK LOOP

- Turn off microphones that are not in use.
- Don't boost tone controls indiscriminately.
- Try to keep microphones and loudspeakers far away from each other.
- Move the loudspeaker closer to the listener.
- Lower the speaker output.
- Use in-ear monitoring systems in place of floor monitors.
