

SMX-266 TRIPOD CRANK-UP SPEAKER STAND

The SMX-266 Tripod Crank-up Speaker Stand makes raising speaker cabinets over 6 feet off the floor as easily as possible. The power crank-up height adjustment system can be operated manually with just one hand. With its solid steel construction and gear teeth milled into the shaft this speaker stand is by far the most affordable on the market!

Solid steel construction and a 1 3/8" upper tube for a universal fit.

Crank housing adjusts your speaker's height from 47" ~79" with ease!

Features locking knob and retractable legs to adjust tripod spread.

Tripod design with a maximum of 34" spread for low center of gravity and equal weight distribution and stability.

California Prop 65 Warning

This product contains chemicals, including lead, known to the State of California to cause cancer and birth defects or other reproductive harm. Wash hands after handling.
