

Starter Bench Tool Kit Content & Task Capability Guide

Thank you for choosing Pedro's! This guide is intended to provide an overview of the tools included in your kit. Please email tech@pedros.com with any questions.

1. Pro Travel Pedal Wrench: Pulling inspiration from our shop wrenches, and using the same laser cut tool steel construction, the Pro Travel Pedal Wrench makes quick work of tough pedals and now doubles as a socket driver for use with Pedro's professional socket tools.

2. Pro Chain Whip: Pedro's Pro Chain Whip takes inspiration from our beloved Vise Whip, applying many of the same functional principles to a more traditional chain whip design. The innovative chain retention hook locks tool onto cassette, ensuring full chain wrap and eliminating slippage. Tool geometry offers maximum effective leverage and compact 270mm length. Compatible with all multi-gear cassettes including most 12-Speed*. Chain retention hook fits cogs up to 18 teeth. Integrated fixed gear lockring wrench optimized for 41-42mm OD lockrings.

3. Cable Cutter: The Pedro's Cable Cutter is an industry favorite and when put to the test against the competition and you will quickly see why. Our cable is designed for years of service, for comfortable and easy usage, and with extra jaw overlap ensuring a clean cut every time.

4. T25 and T30 L Torx Wrenches: The Pedro's L Torx Wrenches are made from heat-treated SNCM-V alloy steel to ensure superior strength and lasting performance. T25 and T30 sizes are the most common torx hardware found on modern bikes.

5. Folding Hex/Screwdriver Set: Pedro's folding wrench sets feature professional grade tool steel for strength, superior anti-corrosion finish for unmatched lasting performance, and body made of lightweight but super tough composite material. The included model includes 2.5, 3, 4, 5 and 6mm hex wrenches and flat-blade and #2 Phillips screwdrivers.

6. 8mm Hex Tip: This heat treated tool steel bit fits onto the 6mm bit of the Folding Hex/Screwdriver Set.

7. Tire Levers: Award winning, universally loved tire levers feature molded box construction and a proprietary plastic composite blend that makes them the strongest levers available. The unique chisel tip shape easily inserts beneath the tire bead and the slightly thicker shape keeps the lever securely in place. Additionally, the bold shape of the lever and helpful dual spoke hooks makes removal of even the tightest tires a simple task.

8. Six-Pack Chain Tool: The Six-Pack Chain tool is made from heat-treated tool steel for strength and lasting performance. The small ergonomic design fits almost anywhere but performs like a full size chain tool. Also features integrated 3.2, 3.3, and 3.5mm spoke wrenches.

9. Quick Link Pliers: These quick link pliers make fast work of pesky or stubborn chain master links. The laser cut, heat-treated jaws feature a dual-function design allowing both installation and removal of master links. Cushioned grips provide comfort and control. Compatible with most 6-12 speed derailleur chain master links including SRAM® Eagle 12 speed*.

10. Cassette Lockring Socket: Pedro's cassette lockring socket provides the professional quality, precision fit tool required to properly install or remove cassette lockrings. Fits all Shimano®, Sram®, SunRace®, SunTour®, Chris King®, and other HG standard cassette lockrings and Shimano® disc brake lockrings.
