

BARISTA ATTITUDE

BARISTA ATTITUDE

We are a brand specialized in the creation of new technical, aesthetic and interface concepts for espresso machines.

We represent the state-of-the-art in these machines through their design, gestural movement of the barista and his or her relationship to the space around them.

Our thermal system precise and stable is the basis of a technology recognized for its superlative reliability consolidated over time.

Everyday for more than two centuries, coffee had been landing in the heart of Europe, in Trieste, a city suspended in time and space, a natural hub between East and West, a meeting point of intercontinental maritime routes and the Adriatic-Baltic and Mediterranean corridors.

Barista Attitude seeks to bring back to life those values believed to have been lost over time by adopting a new cultural and artisanal approach.

Tempesta Multiboiler

We believe in the beauty of ergonomics because we also understand the concept of the scenic importance of the space around us

Tempesta Multiboiler

SAEP MULTIBOILER VERSION

Tempesta Multiboiler

	2GR	3GR
VOLTAGE (V)	230/240-400/415	230/240-400/415
MAXIMUM ABSORBED POWER (W)	4800-5230	6400-6970
LOAD CAPACITY OF THE STEAM HEATING UNIT (LT)	8.5	8.5
WEIGHT (KG)	85	105
WIDTH (MM)	1035	1175
DEPTH (MM)	618	618
HEIGHT (MM)	500	500

Colours

Matt black / Black trims	
Matt black / Chrome trims	
White / Chrome trims	
White / White trims	
Copper / Black trims	

Standard features

- Electronic cup warmer
- LED-lit work counter
- LED back light with light-intensity change
- Energy Saver: automatic On/Off and Standby
- Mode of use: comfort (machine always active) weekly programming (programming of time slots for standby), Eco (self-learning based on machine operation)
- Views: time, brewing temperature, brewing chart, brewing pressure
- Machine parameters export
- Counts: number of coffee and hot water delivered, liters of water consumed, warning regenerations filters, grinder wear and tear, number of washing performed
- Digital boiler pressure display and control
- Digital delivery pressure display
- USB port
- User interface: a display for each group; choice of skin type
- Maintenance: servicing for scheduled maintenance
- Languages (Italian, English, German, French, Spanish, Portuguese, Chinese and Russian)
- Customizable screensaver
- Dose programming
- Coffee recipes: possibility of parameter settings for different types of coffee
- Basin and feet height adjustable
- Barista attitude: anti-scalding steam wand
- Super Dry: dry steam dispensing system
- Steam Boost (SB): activated by technician, depending on the operating needs of steam
- Hydraulic circuit efficiency control system

Optional

- WiFi for telemetry
- Autosteamer
- Beans2Cloud Management System
- C-UL-US + NSF

Approved product

Tempesta FRC

BARISTA ATTITUDE

All FRC technology and design were conceived to put the gestural expressiveness and professionalism of baristas.

Tempesta FRC

SAEF FLOW RATE CONTROL VERSION

Tempesta FRC	2GR	3GR
VOLTAGE (V)	230-400/240	230-400/240
MAXIMUM ABSORBED POWER (W)	4800-5230	6400-6970
LOAD CAPACITY OF THE STEAM HEATING UNIT (LT)	8.5	8.5
WEIGHT (KG)	85	105
WIDTH (MM)	1035	1175
DEPTH (MM)	618	618
HEIGHT (MM)	500	500

Colours

Matt black/Black trims	
Matt black/Chrome trims	
White/Chrome trims	
White/White trims	
Copper/Black trims	

Standard features

- 2 "Barista Attitude" steam wands
- 1 mixed water
- 5" display for each group head
- FRC extraction system
- LED worktop lighting
- Electronic cup warmer
- "Superdry" steam
- SteamBoost(SB)
- Incorporated motor pump

Optional

- Grupos elevados (altura mm 150)
- Autosteamer
- Beans2Cloud Management System
- KC Korea
- C-UL-US + NSF

- Machine parameters export
- Counts: number of coffee and hot water delivered, liters of water consumed, warning regenerations filters, grinder wear and tear, number of washing performed
- Digital boiler pressure display and control
- Digital display and control
- Digital Gara
- USB port
- User interface: a display for each group; choice of skin type
- Maintenance: servicing for scheduled maintenance
- Languages (Italian, English, German, French, Spanish, Portuguese, Chinese and Russian)
- Customizable screensaver
- Dose programming
- Coffee recipes: possibility of parameter settings for different types of coffee
- Basin and feet height adjustable
- Barista attitude: anti-scalding steam wand
- Super Dry: dry steam dispensing system
- Steam Boost (SB): activated by technician, depending on the operating needs of steam
- Hydraulic circuit efficiency control system
- Configuration of brewing curves for each key
- Brewing curve and pression

Gara Optional

- WiFi for telemetry
- Autosteamer
- VST ridge filters diameter 58 capacity 20gr
- Double filter holder
- Bottomless filter holder

Approved product

The side and rear panels are mechanically connected by screws embedded in the frame; the removal of all panels is simplified, which makes access to the internal parts easier. The electronic control unit can be accessed by removing the left panel. The tilting compartment allows accessing the electrical and electronic components of the power supply system directly from the heater cover front panel, without any need to remove the rear panel.

The Barista Attitude anti-scald and cantilevered steam wand offers great safety and easy return movement to the basin, in case of inactivity. Super Dry is the innovative system that keeps the steam dry and with minimum initial condensation, guaranteed by a solenoid valve placed in the discharge. A reduced quantity of humid steam is discharged at 110°C in order to guarantee the presence of dry steam ready for use. The new Super Dry system guarantees continuous steam use without decreasing performance, even when two steam wands are used simultaneously.

In Tempesta Gara, the basin adjustment lets the barista keep the cup at the best level for the beverage being made. Routine cleaning operations are also more fluid and uniform thanks to the rounded shape, whereas washing is facilitated by the sliding extraction of the basin.

The loading and unloading hoses and feed inputs are connected within a cylindrical structure that makes the visible part of the machine more elegant and neat. As a result, cables and hoses are directly connected to the hole on the counter, avoiding the exposure of cables.

Tempesta Gara rests on stainless steel supports that ensure durability and cleanliness. The feet are made of polished stainless steel, and fitted with single (10mm) front and rear adjustment to ensure that Storm perfectly rests on the counter.

Green Line: low environmental impact, reduces consumption up to 47.6% compared to traditional coffee machines.

Thanks to innovative software that manages the standby automatic system during breaks, night-time energy-saving function and intelligent temperature regulation, Tempesta distributes power only where and when needed.

In addition, Tempesta automatically puts one or more groups into standby mode when the workload decreases, reverting to full-time mode as warranted by circumstances.

F

The group cover houses a 7" display and an electromechanical competition key that, once positioned exactly above the filter holder, allows its coupling and manual start-up in a single movement. The crank as it is easy to remove e for maintenance work on it and on the display.

G

Tempesta Gara is equipped with a capacitive 5" display per group, with which it is possible to:

- Program the brewing curves for each group
- Set the dispensing temperature for each group
- Display the graph of the last coffees prepared
- Set the power saving mode
- Program doses
- Display counters
- Wash group
- Change hot water temperature
- Connect to the Cloud Server
- Changing hot water temperature

H

To make Tempesta Gara usable under any light condition and ensure that coffee is optimally viewed inside the cup, the work counter features LED lights, whose intensity can be adjusted from the display directly by the user.

I

Tempesta Gara is equipped with the SB (Steam Boost) option, which can be activated by the technician during installation. SB increases steam production by activating the heating units even during high-volume espresso making (alternating power between service and coffee heating units).
