

LA PAVONI

BAR series

BAR T2V-B

BAR T & L Models

Available in 2 & 3 group versions. T models feature volumetric programmable touch pads. L models feature piston operated lever arms to draw shots of espresso.

Both units have separate solenoids allowing for multiple users to operate the unit simultaneously, boiler auto fill systems and mounted pressure gauges. The solid brass groups are chrome plated for durability. Machines operate on 230 Volt for maximum power. Stainless steel water line installation kits are included.

Available in red or black side panels.

BAR T3V-R

Specifications	BAR-T2	BAR-T3
Front Width	29	36
