## **Junior "Pulse" burr grinder**

Since 1953 OBEL has manufactured the highest quality commercial coffee grinders under the OBEL name as well as private label for some of the largest espresso machine companies in the world.

The Junior "Pulse" is the perfect mid-sized grinder bridging the gap between a home and full size commercial grinder. This is an on-demand grinder activated with a touch of the pulse switch, quick, simple operation with almost no coffee waste!

Suitable for light commercial use it is perfect for all grinds including decaf or flavored coffee. It features 2 bean hoppers, one 8.8 ounce hopper and a larger 1.75 lb commercial hopper. As a home grinder there is no equal. The low mounted motor ensures that heat is not transferred to the beans and the polished stainless steel case is not only beautiful but strong.

### **SPECIFICATIONS #902MP**
