Probiotic Cleaner & Odour Control

PRO Harmony introduces cutting-edge, safe, biological cleaning technology.

This all-purpose cleaner harnesses the power of probiotics, offering a unique cleaning experience that sets it apart from conventional products.

Why Probiotics?

With the power of probiotic technology, Pro Harmony is environmentally friendly and supports ecological balance. Unlike traditional cleaners, it penetrates deep into hard-to-reach areas like cracks and joints, delivering a thorough clean that goes beyond the surface. The probiotics continue to work by settling into these spaces and multiplying, forming a protective biofilm. This biofilm remains active, offering ongoing protection by inhibiting the growth of harmful microorganisms long after the initial cleaning is done.

When you use PRO Harmony, the food and plant-based ingredients provide an initial, thorough clean. But the real magic happens after—the probiotics, which are safe for food-contact surfaces, remain on the surfaces, continuing to work long after you've finished cleaning. These beneficial bacteria penetrate into tiny cracks and crevices where harmful bacteria typically thrive, outcompeting and eliminating them.

Unlike traditional cleaners that indiscriminately kill all bacteria, PRO Harmony leaves behind a protective layer of good bacteria. This creates a barrier that helps prevent bad bacteria from taking hold, ensuring a cleaner, healthier environment.

Where Can PRO HARMONY Be Used?

KITCHEN SURFACES:

Pro Harmony is perfect for tackling tiles, splashbacks, cupboards, fridges, stainless steel, tap fittings, walls, sinks, and benches. It keeps your kitchen surfaces spotless and safe.

ODOUR CONTROL:

Pro Harmony's powerful probiotics naturally break down organic matter that causes bad odours. Whether dealing with urine, faeces, vomit, milk, or water spills on carpets, our beneficial bacteria work through the layers to remove odours quickly and safely. Ideal for use on soft furnishings, carpets, pet areas, blankets, toilets, bins, and more.

CARS AND TRUCKS:

Keep your vehicles fresh with Pro Harmony. Clean and deodorise all surfaces, from carpets to dashboards. It's especially effective for removing stubborn odours like milk spills. You can even add it to your windscreen washer fluid (50ml) for a crystal-clear windshield.

COMPLETE BATHROOM CLEANER:

Pro Harmony is ideal for cleaning toilets, sinks, showers, shower glass, tiles, taps, urinals, baths, and more, ensuring your bathroom stays spotless and hygienic.

COMMERCIAL KITCHENS:

Pro Harmony is suitable for cleaning all areas in a commercial kitchen except food preparation surfaces. This is because regulatory tests in commercial kitchens might not distinguish between good and bad bacteria.

CARAVANS:

Pro Harmony is perfect for small spaces like caravans, cleaning and deodorising all surfaces, including toilets, to keep your mobile home fresh and odour-free.

CHILDREN'S PLAY AREAS:

Safe for children's play areas, Pro Harmony is perfect for cleaning toys and wiping down baby changing stations, ensuring a clean and healthy environment.

PET AREAS:

Eliminate pet-related odours with ease. Pro Harmony effectively removes smells from urine, faeces, vomit, and other pet-related messes from bedding, carpets, car interiors, synthetic grass, and more.

DILUTION RATES & HOW TO USE PRO HARMONY

For general odour control:

Mix 20ml of **Pro Harmony** with 500ml of water (1 part Pro Harmony to 25 parts water)

For strong, persistent odours:

Increase the concentration to 50ml in a 500ml bottle (1 part **Pro Harmony** to 10 parts water)

For best results, refresh the spray bottle every 3 to 4 weeks.

Carpet Cleaning

(Urine, Vomit, Faeces, and Water Damage):

Start by removing any solids and absorbing excess liquids with a paper towel.

Then, spray the affected area with a mixture of 20ml of **Pro Harmony** in a 500ml bottle (1 part Pro Harmony to 25 parts water).

Cover up to three times the surface area to ensure thorough treatment, and allow 30 minutes for the natural probiotics to eliminate odours.

Windows And Mirrors:

For sparkling clean windows and mirrors, dilute 5ml of **Pro Harmony** in a 500ml spray bottle (1 part Pro Harmony to 100 parts water). Spray the solution on the surface and wipe it off with a high-quality cloth.

Shower Cleaning:

For a pristine shower, mix 20ml of **Pro Harmony** with 500ml of water (1 part Pro Harmony to 25 parts water). Spray all shower surfaces, including the glass, scrub with a non-scratch scourer, and let it sit or rinse off. Pro Harmony also acts as a mould inhibitor.

Spray & Wipe:

To create an effective surface cleaner, mix 20ml of **Pro Harmony** with 500ml of water (1 part Pro Harmony to 25 parts water). Spray generously on the surface, agitate if needed for stubborn spots, and wipe clean with a cloth.

Odour Control:

Pro Harmony is perfect for eliminating odours in carpets, pet beds, linens, bins, drains, and toilets. Use the following dilution rates:

Floor Cleaning and Mopping:

For floors, dilute 50ml of **Pro Harmony** in a 10-litre bucket (1 part Pro Harmony to 200 parts water). After mopping, pour the waste water into your toilet, shower, or drains to help clean and boost your septic system.

Toilet Cleaning (Including Caravans and RVs):

For a fresh, clean toilet, squeeze 25ml of **Pro Harmony** into the bowl, scrub with a toilet brush, and leave it for as long as possible before flushing.

Septic and Biocycle Systems:

Pro Harmony is ideal for septic and biocycle systems. Use it to clean your toilet or pour mop water down the drain to enhance the bacteria in your septic system, helping to break down solids and improve overall performance.
