

The U2 Ultra is suitable for ultra sensitive people who have medium exposure to wireless microwave radiation.

1 per floor or 1 per house or office, this has large area coverage and is cost effective.

Upon installation make sure the desired area is clean and dry and dust free. If necessary use alcohol to wipe the area to remove any oily substances.

The product can only be stuck once so make sure it is lined up straight with your selected area and be careful to install it as straight as possible. We will not be held responsible for wonky installations.

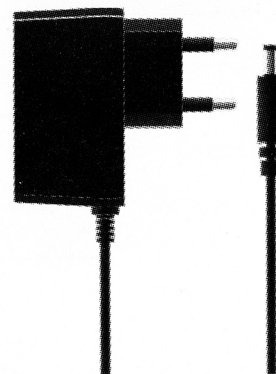

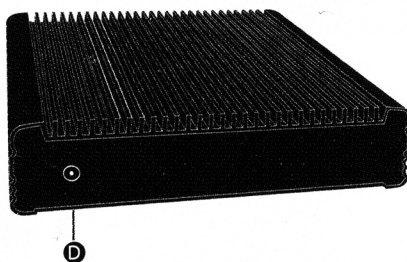

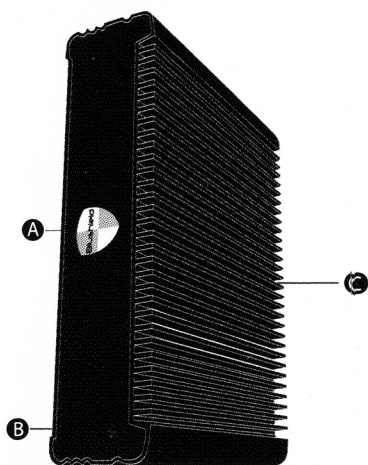

The U2 Ultra carries a limited warranty for a period of 1 year. This does not cover misuse, modification or neglect, power surge or dropping and water damage. If a claim is to be made all postage costs are to be covered by the customer.

This product is not water proof as with all electronic products this is not covered by warranty. Exposure to damp areas, steam or water is more than likely to permanently damage your U2 Ultra.

Installing the U2 Ultra on painted surfaces and/ or wallpaper will later damage the surface if you should remove or attempt to pull it off the stuck on surface. We will not be held responsible for damage incurred in doing so. When installing the product can only be stuck once and once stuck any attempt to remove may cause damage to the surface it is stuck upon. Make sure to carefully measure and if necessary use a pencil to mark a straight line on which you wish to install the U2 Ultra.

Quick Start Guide

U2 Ultra

Find a suitable area to install your U2 Ultra, preferably the center of your home or office. The backing is designed to be stuck to any wall and be unobtrusive. First remove the backing before sticking to a clean dry surface. Installed behind furniture or in a hallway any central area is ok. Just make sure there is sufficient access to a power point to plug-in the power pack. Once installed keep it plugged in 24/7 for best effect.

This is the power pack that comes in 4 plug types. EU UK AU and US. It is designed to use on any international AC power outlet from 100 to 240 volts.

Safety tested and approved for dry areas in the home does not interfere with WIFI or wireless systems within the covered area.

Allows for complete protection from wireless microwave radiations, for all occupants within the given protected area.
