Macutene® and the AREDS2 Clinical Trial

The Age-Related Eye Disease Study (AREDS®) and the AREDS2® clinical trials were led by the National Eye Institute (part of the U.S. National Institutes of Health). The AREDS® and AREDS2® clinical trials determined that daily high doses of antioxidants and minerals can help support macular health.

Macutene® is an AREDS2® based formulation of ultra-premium ingredients to support macular health.

AREDS2® is a registered trademark of the US Department of Health and Human Services, which is not affiliated with Eyecheck, Inc.

These statements have not been evaluated by the Food and Drug Administration. Pristene® is not intended to diagnose, treat, cure or prevent any disease.

Macutene® Protect is intended for healthy adults, 18 years of age or older. Do not take this product if you are pregnant or nursing. Please consult with a licensed, qualified, healthcare professional before using Macutene® Protect or any dietary supplement product. EC012

Vitamin C

An essential nutrient for eye health and a powerful antioxidant. The Vitamin C in Macutene Protect is made using Quali-C from Scotland, which is free of byproducts & contaminants.

Lutein

RR & RS (meso) Zeaxanthin - Sourced from non-GMO marigold seeds, these antioxidants are found in the macula, the part of your eye responsible for sharp, detailed central vision.

Zinc

In citrate form for increased absorption; an essential mineral that protects the macula and supports dark adaptation.

Copper

Encourages the development of flexible connective tissue for proper eye structure and helps supplement the intake of zinc.

Vitamin E

Natural, non-synthetic; Protects cell membranes against damage from free radicals and supports retinal health; in d-alpha tocopherol form to help cross blood retina barrier.

Quercetin

Found in fruits and vegetables, quercetin is a potent antioxidant that helps support retinal health.

Bilberry Extract

A superfood containing powerful antioxidants that help protect the retina and support night vision.

EGCG

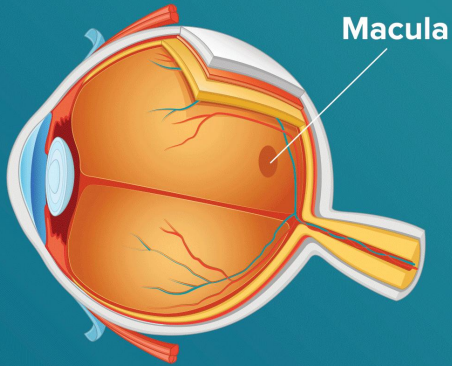

A powerful antioxidant found in green tea, EGCG supports macular health by protecting from free radicals.

AREDS2® BASED FORMULA

What is the Macula?

The retina is the tissue that lines the back of the eye. The macula, a part of the retina, is a small oval shaped area, about 5 mm in diameter.

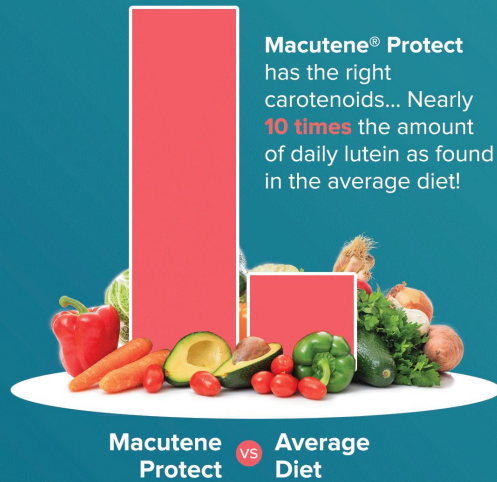

The macula is responsible for our sharp, detailed central vision, such as driving and reading. It is also responsible for most of our color vision.

Carotenoids nourish your eyes

Carotenoids—pigments that give fruits and vegetables their vibrant colors—have a unique role in protecting the macula against oxidative stress.

The three essential carotenoids in Macutene® Protect, Lutein, RR-zeaxanthin, and RS (meso)-zeaxanthin, are sourced from naturally derived marigold extract from Non-GMO marigold seeds. Macutene® Protect provides all three in the same 5:1 ratio as found in nature for increased nutrient availability.

Here's the problem...

Carotenoids found in the macula can only be obtained through our daily diet or supplementation.

Even with the healthiest of diets, our eyes don't get enough of the essential carotenoids we need for a healthy macula.

Most of us need to take a high-quality supplement to ensure optimal intake of carotenoids for healthy eyes.

**You would have to eat
over 8 servings
of nuts and vegetables a
day to receive the same
nutrient value as
Macutene® Protect!**

Introducing Macutene® Protect

Macutene® Protect provides optimal levels of all three essential carotenoids necessary for supporting eye health and vision. It specifically supports the macula, which is responsible for the highest visual performance.

Protect your eyes as nature intended

NSF Certified - Assures consumer safety with rigorous outside expert contaminant testing and verifying manufacturing consistency.

Certified Vegan - No animal or animal by products, including animal derived GMO's

Certified Gluten-Free - gluten is a protein found in wheat that many people are sensitive or allergic to

Non-GMO - no genetically modified organisms
