

Winner in the Medical Device Category for TechAmerica Foundation American Technology Awards

PRESS RELEASE, Aspen Medical Products, Inc, manufacturer of spinal bracing, has been named the winner in the Medical Device category for the American Technology Awards, which bestows the only "Best Of" awards that recognize all technology products and services for the technology industry. The award was attributed to the Vista Collar, which offers 6 sizes in 1 cervical collar. Nominations for The American Technology Awards "The Termans" were vetted by industry experts and technology companies. These awards have been named after Frederick Terman, who is widely credited as being the father of Silicon Valley.

Aspen Medical Products, Inc is a leader in the innovation of spinal bracing solutions. The company occupies a 51,000 square-foot facility in Irvine, California.

Geof Garth, Aspen Medical Products vice president of research and development states, "Aspen's Vista® collar is the culmination of years of design, testing, and refinement. We are excited to have the effort recognized, not only by our customers, but by receiving the American Technology Award for the Medical Device category from the TechAmerica Foundation."

"We had a lot of nominations for these prestigious awards, and we congratulate Aspen Medical Products, Inc. for their winning achievement," said Phil Bond, chairman, TechAmerica Foundation. "TechAmerica Foundation is excited to highlight Aspen Medical Products, Inc. as it continues to influence technology development throughout the rest of the world."
