

Juke Box S2

„A completely successful all-in-one system.“

The turntable as the center -this is the idea behind Pro-Juke's Juke Box S2, which is now available as a discounted complete package including compact speakers and accessories. The fact that the Pro-Ject-typical product has more to offer than a plate-turntable can already be recognized by the front-mounted pressure / dial control and the pale blue backlit, narrow display on its top. According to Pro-Ject's claim, the construction of the system is very simple. Hearing pleasure instead of construction frustration is the motto.

Verdict

A completely successful all-in-one system, when the focus is on record playback. Thanks to the carefully composed connection menu, the Juke Box S2 can be used flexibly. Even for music played wirelessly via Bluetooth.
