

Speaker Box 5

05.2022

"I'm shocked – they could charge \$500 for these."

Watch the Video

- I didn't have a problem **driving** them off **most of the amplifiers** I have in the house.
- These are **really, really, really, really good** – **highly impressed** – talking about the speaker as a whole.
- The first thing I heard was a **very three-dimensional sound stage** – **great centre imaging**.
- I can't believe **how big they play**.
- Fairly hefty – **built well**.
- Midrange is very **clear, detailed** and **very enjoyable**.
- **Treble is organic and real**

- The **bass is surprisingly good – the punch**. The woofer is very solid. They **handled bass very, very well** as far as **cleanliness** goes.– you're getting some **excursion**.

- The **bass you're getting is more** than you probably should get out of a speaker this size. **Tone and texture is very good**.
- At \$350, it's a **solid deal**.
